## AZZALURE®

Ipsen Biopharm Ltd.

### Active Composition

Clostridium botulinum toxin type A toxin-haemagglutinin complex

### Package Includes

2 vials containing 125 Speywood units.

### Product Summary

Azzalure® injections contain the active ingredient botulinum toxin type A, which is a toxin produced by the bacteria Clostridium botulinum.

Azzalure® is indicated to temporarily improve the appearance of severe vertical frown lines between the eyebrows in adults.

An improvement in the appearance of the frown lines between the eyebrows is generally seen after 2 or 3 days. The effect of these injections lasts for up to 4 months.

## BOCOUTURE® (XEOMIN) 100U

Merz Pharma

### Active Composition

Clostridium Botulinum neurotoxin type A (150kD), free from complexing proteins

### Package Includes

1 vial containing 100 LD50 units of powder for solution for injection.

### Product Summary

The active ingredient in Bocouture® is botulinum toxin type A, purified from cultures of Clostridium botulinum (Hall strain).

It is indicated for the temporary improvement of moderate to severe vertical lines between the eyebrows, moderate to severe lateral periorbital lines and moderate to severe horizontal forehead lines.

Effects last for about 3 to 6 months.

## BOCOUTURE® 50U

Merz Pharma

### Active Composition

Clostridium Botulinum neurotoxin type A (150 kD), free from complexing proteins

### Package Includes

2 vial containing 50 LD50 units of powder for solution for injection.

### Product Summary

The active ingredient in Bocouture® is botulinum toxin type A, purified from cultures of Clostridium botulinum (Hall strain).

It is indicated for the temporary improvement of moderate to severe vertical lines between the eyebrows, moderate to severe lateral periorbital lines and moderate to severe horizontal forehead lines.

Effects last for about 3 to 6 months.

## BOTOX® 50U

Allergan, Inc.

### Active Composition

Botulinum toxin type A (from *Clostridium botulinum*)

### Package Includes

1 vial with 50 Allergan units in a thin film for solution for injection

### Product Summary

The active ingredient in Botox® is botulinum toxin type A. Botox® is presented as a white powder in a transparent glass vial. Prior to injection, the product must be dissolved in a sterile saline solution.

Botox® is used to eliminate glabellar lines, frown lines, crow's feet, other fine lines or deep facial wrinkles. It is also used to control persistent muscle spasms in the eyelids and face; muscle spasms in the neck and shoulders; muscle spasms in the wrists and hands of stroke patients; excessive sweating of the armpits; leakage of urine due to bladder problems associated with spinal cord injury or MS; prevention of migraine headaches.

Effects last for about 3 to 6 months.

## BOTOX® 100U

Allergan, Inc.

### Active Composition

Botulinum toxin type A (from *Clostridium botulinum*)

### Package Includes

1 vial with 100 Allergan units in a thin film for solution for injection

### Product Summary

The active ingredient in Botox® is botulinum toxin type A. Botox® is presented as a white powder in a transparent glass vial. Prior to injection, the product must be dissolved in a sterile saline solution.

Botox® is used to eliminate glabellar lines, frown lines, crow's feet, other fine lines or deep facial wrinkles. It is also used to control persistent muscle spasms in the eyelids and face; muscle spasms in the neck and shoulders; muscle spasms in the wrists and hands of stroke patients; excessive sweating of the armpits; leakage of urine due to bladder problems associated with spinal cord injury or MS; prevention of migraine headaches.

Effects last for about 3 to 6 months.

## BOTOX® 100U NON-ENGLISH

Allergan, Inc.

### Active Composition

Botulinum toxin type A (from *Clostridium botulinum*)

### Package Includes

2 vial with 100 Allergan units in a thin film for solution for injection

### Product Summary

The active ingredient in Botox® is botulinum toxin type A. Botox® is presented as a white powder in a transparent glass vial. Prior to injection, the product must be dissolved in a sterile saline solution.

Botox® is used to eliminate glabellar lines, frown lines, crow's feet, other fine lines or deep facial wrinkles. Effects last for about 3 to 6 months.

## BOTOX® COSMETIC 100U

Allergan, Inc.

### Active Composition

Botulinum toxin type A (from *Clostridium botulinum*)

### Package Includes

3 vial with 100 Allergan units in a thin film for solution for injection

### Product Summary

The active ingredient in Botox® is botulinum toxin type A. Botox® is presented as a white powder in a transparent glass vial. Prior to injection, the product must be dissolved in a sterile saline solution.

Botox® is used to eliminate glabellar lines, frown lines, crow's feet, other fine lines or deep facial wrinkles. Effects last for about 3 to 6 months.

## DYSPORT® 300U

Ipsen Biopharm Ltd.

### Active Composition

Clostridium botulinum toxin type A toxin-haemagglutinin complex

### Package Includes

Each vial contains 300 units of sterile freeze-dried powder for reconstitution.

### Product Summary

Dysport® and Reloxin® are the same product. Dysport® 300U is made from botulinum toxin type A as is Botox®. Dysport® and Botox® are similar, although they may differ in cost, dosage, and effect.

Some cosmetic surgeons also like to alternate between using Dysport® and using Botox®, since some patients may get "Botox® burnout" and stop responding. Choosing Dysport® versus Botox® may come down to a matter of preference, although many patients still prefer to ask for Botox® by name.

The effects of Dysport® injections are not immediate, but some patients may already see a difference the next day after their treatment. Dysport® will usually last about 3 to 6 months.

## DYSPORT® 500U

Ipsen Biopharm Ltd.

### Active Composition

Clostridium botulinum toxin type A toxin-haemagglutinin complex

### Package Includes

Each vial contains 500 units of sterile freeze-dried powder for reconstitution.

## NEUROBLOC® (MYOBLOC®)

Eisai Ltd.

### Active Composition

Botulinum Toxin Type B

### Package Includes

1 vial containing 5,000 U/ml solution for injection

### Product Summary

Myobloc®, also known as NeuroBloc®, is made from a toxin produced by Clostridium botulinum bacteria.

NeuroBloc® is approved to treat cervical dystonia, also called spasmodic torticollis. Since Myobloc® is similar to Botox®, many doctors use Myobloc® for many similar uses, such as treating hyperhidrosis and correcting facial wrinkles and creases.

Effects usually last 12 to 16 weeks.

## XEOMIN® 100U

Merz Aesthetics

### Active Composition

Clostridium Botulinum neurotoxin type A (150kD), free from complexing proteins

### Package Includes

1 vial contains 100 LD50 units of powder for solution for injection

### Product Summary

Xeomin®, also known as incobotulinumtoxinA, is made from botulinum toxin type A, just like Botox®.

Xeomin® cosmetic treatments can help: wrinkles on mature skin; moderate to severe facial lines such as frown lines; muscle spasms, such as cervical dystonia (CD); blepharospasm; spasmodic torticollis; spasmodic dysphonia of the vocal chords; oromandibular dystonia of the mouth, tongue and pharynx; writer's cramp; overactive bladder; excessive underarm sweating; strabismus.

Xeomin® takes a few days to start reducing the look of your patient's wrinkles or severe lines. Generally, your patients should enjoy smoother skin for about 3 to 6 months.

## BELOTERO® BALANCE WITH LIDOCAINE

Merz Aesthetics

### Active Composition

22.5mg/ml cross-linked sodium hyaluronate of non-animal origin, 3mg /ml lidocaine hydrochloride

### Package Includes

1x1ml prefilled syringe, 1x27G1/2" needle, 1x30G1/2" needle.

### Product Summary

The world's first monophasic hyaluronic acid dermal filler, Belotero® Balance is made with patented Cohesive Polydensified Matrix Technology.

You can use Belotero® Balance to: correct areas such as bumps on the bridge of the nose; fill in cheeks; smooth nasolabial folds; remove perioral lines; correct marionette lines; rejuvenate your patient's lips and enhance their vermillion border; moisturize or plump lips; improve the texture of the décolletage or the back of their hands.

Results last for at least 9 months. This filler is also available without lidocaine.

## BELOTERO® INTENSE WITH LIDOCAINE

Merz Aesthetics

### Active Composition

25.5mg/ml cross-linked sodium hyaluronate of non-animal origin, 3mg /ml lidocaine hydrochloride

### Package Includes

1x1ml prefilled syringe, 2x27G1/2" needles.

### Product Summary

Belotero® intense is a smooth dermal filler made with Cohesive Polydensified Matrix technology. Belotero® intense instantly hydrates and plumps your patient's skin, filling in deep lines and wrinkles. Belotero® intense follows the natural contours of the face.

You can use Belotero® intense to: correct areas such as folds and deep wrinkles of the face; provide significant volume enhancement of reliefs and contours of the face; enhance lip volume.

The presence of lidocaine aims to reduce local pain associated with the injection of the gel and to improve patient comfort. Belotero® intense provides the affected area a smoother, more youthful look for at least 9 months. This filler is also available without lidocaine.

## BELOTERO® SOFT WITH LIDOCAINE

Merz Aesthetics

### Active Composition

20mg/ml cross-linked sodium hyaluronate of non-animal origin, 3mg/ml lidocaine hydrochloride

### Package Includes

1x1ml prefilled syringe, 2x30G1/2" needles

### Product Summary

Belotero® Soft is a sterile, non-pyrogenic, viscoelastic, colorless, transparent gel of non-animal origin, created using patented Dynamic Mesh and Cohesive Polydensified Matrix technologies.

Belotero® Soft is designed to treat wrinkles on foreheads, perioral wrinkles, mouth lines, crow's feet or any other fine lines or facial wrinkles.

The presence of lidocaine aims to reduce local pain associated with the injection of the gel and to improve patient comfort. Give the affected area a smoother, more youthful look for at least up to 9 months. To ensure optimal use of the product, it is recommended to use the needles provided in the box. This filler is also available without lidocaine.

## BELOTERO® VOLUME WITH LIDOCAINE

Merz Aesthetics

### Active Composition

26mg/ml cross-linked sodium hyaluronate of non-animal origin, 3mg/ml lidocaine hydrochloride

### Package Includes

2x1ml prefilled syringes, 2x27G 37mm cannulas, 2x25G 12.77mm needle, 2x27G needles, 2x30G needles.

### Product Summary

Belotero® Volume is a transparent, sterile gel made of hyaluronic acid.

The hyaluronic acid in Belotero® Volume can help restore volume to areas of your patient's face, such as their cheeks, cheekbones, and temples, giving them a fuller appearance and helping to lift sagging skin and smooth wrinkles.

Your patients will notice an immediate improvement in their facial volume when you give them a Belotero® Volume treatment. These results usually last up to about 18 months. This filler is also available without lidocaine.

## CYTOCARE 516

Laboratoires Revitacare

### Active Composition

Hyaluronic acid

### Package Includes

10 vials x 5ml

### Product Summary

Cytocare 516 is an injectable skin rejuvenation booster made of hyaluronic acid and a rejuvenating complex.

Cytocare 516 is suitable for your patients who have early signs of aging on their face and neck. This injectable skin rejuvenation solution contains 16mg of hyaluronic acid, the right amount to fill fine lines and improve the look of the skin without adding large amounts of volume. It revitalizes the skin to correct early signs of aging, restoring moisture and radiance to the skin.

An initial set of treatments consists of 3 treatments 3 weeks apart, and to maintain the results, repeat the treatment once every 3 months.

## CYTOCARE 532

Laboratoires Revitacare

### Active Composition

Hyaluronic acid

### Package Includes

10 vials x 5ml

### Product Summary

Cytocare 532 is an injectable skin booster and dermal filler containing hyaluronic acid and a rejuvenating complex with vitamins, minerals, amino acids, and other skin nutrients.

Cytocare 532 is suitable for injection into the middle dermis or superficial dermis of the face or neck for correcting fine lines and wrinkles, rehydrating and rejuvenating the skin. Of the 3 Cytocare products, Cytocare 532 has the highest concentration of hyaluronic acid at 32mg. This means it is most suitable for your patients who already have signs of aging.

Cytocare 532 treatments begin with 3 treatments at 3 week intervals followed by a maintenance treatment every 3 months.

## DESIRIAL®

Vivacy

### Active Composition

IPN-Like cross-linked sodium hyaluronate (19mg/ml)

### Package Includes

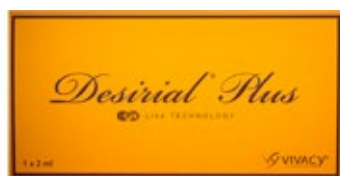

2x1ml prefilled syringes, 2x27G1/2" needles, 2x30G1/2" needles.

### Product Summary

Desirial® contains cross-linked hyaluronic acid which is made using IPN-Like® Technology (Interpenetrated Network). Desirial® contains mannitol to reduce redness and swelling.

It is suitable for peri-menopausal women or those of reproductive age who are suffering from dehydration of the vulva, with or without irritation. Desirial® is used to treat trophic conditions, restoring hydration, tone, elasticity and sensitivity. It reduces mucosal dryness and strengthens the delicate muscles within the vagina, restoring suppleness.

Treatment lasts for at least 6 months, but usually for approximately 1 to 2 years. Results are usually visible immediately.

## DESIRIAL® PLUS

Vivacy

### Active Composition

IPN-Like cross-linked sodium hyaluronate (21mg/ml)

### Package Includes

1x2ml prefilled syringe, 2x27G1/2" needles and 1x18G cannula

### Product Summary

Desirial® Plus contains cross-linked hyaluronic acid which is made using IPN-Like® Technology. It contains mannitol, used to reduce the side effects of injecting hyaluronic acid, namely, redness and swelling.

Desirial® Plus is for peri-menopausal, menopausal and those of reproductive age with a predisposition for moderate to severe hypotrophy or atrophy of the labia majora. This cohesive gel is used to treat imperfections of the vulva, as well as functional disorders including vaginal atrophy and moderate to severe symptoms of lipoatrophy of the labia majora.

Treatment lasts for at least 6 months, but usually for approximately 1 to 2 years. Results are usually visible immediately.

## ELLANSÉ® E

AQTIS Medical BV.

### Active Composition

PCL microspheres

### Package Includes

2x1ml syringes, 4x27G3/4" needles

### Product Summary

Ellansé® E is an injectable implant for volume restoration within the dermis. It is a sterile, latex-free, non-pyrogenic, totally bioresorbable, non-permanent implant, made of synthetic Poly-e-Caprolactone (PCL) microspheres suspended in a gel carrier of carboxymethylcellulose (USP), phosphate buffered saline (PhEur), and glycerin (PhEur).

Ellansé® E provides natural-looking and long-lasting wrinkle or volume correction to the skin.

This product instantly adds volume and, as it gradually breaks down and is replaced with collagen, patients should continue to enjoy the results of their anti-aging treatment. In most patients, Ellansé® E results should last for about 4 years.

## ELLANSÉ® L

AQTIS Medical BV.

### Active Composition

PCL microspheres

### Package Includes

2x1ml syringes, 2x1ml syringes, 4x27G3/4" needles

### Product Summary

Ellansé® L is an injectable implant for volume restoration within the dermis. It is a sterile, latex-free, non-pyrogenic, totally bioresorbable, non-permanent implant, made of synthetic Poly-e-Caprolactone (PCL) microspheres suspended in a gel carrier of carboxymethylcellulose (USP), phosphate buffered saline (PhEur), and glycerin (PhEur).

Ellansé® L provides natural-looking and long-lasting wrinkle or volume correction to the skin.

This product instantly adds volume within the dermis and, as it gradually breaks down and is replaced with collagen, patients should continue to enjoy the results of their anti-aging treatment. In most patients, results should last for about 3 years.

## ELLANSÉ® M

AQTIS Medical BV.

### Package Includes

2x1ml syringes, 4x27G3/4" needles

### Product Summary

Ellansé® M is an injectable implant for volume restoration within the dermis. It is a sterile, latex-free, non-pyrogenic, totally bioresorbable, non-permanent implant, made of synthetic Poly-e-Caprolactone (PCL) microspheres suspended in a gel carrier of carboxymethylcellulose (USP), phosphate buffered saline (PhEur), and glycerin (PhEur).

Ellansé® M provides natural-looking and long-lasting wrinkle or volume correction to the skin.

This product instantly adds volume and, as it gradually breaks down and is replaced with collagen, patients should continue to enjoy the results of their anti-aging treatment. In most patients, results should last for about 2 years.

## ELLANSÉ® S

AQTIS Medical BV.

### Active Composition

PCL microspheres

### Package Includes

2x1ml syringes, 2x1ml syringes, 4x27G x 3/4" needles

### Product Summary

Ellansé® S is an injectable implant for volume restoration within the dermis. It is a sterile, latex-free, non-pyrogenic, totally bioresorbable, non-permanent implant, made of synthetic Poly-e-Caprolactone (PCL) microspheres suspended in a gel carrier of carboxymethylcellulose (USP), phosphate buffered saline (PhEur), and glycerin (PhEur).

Ellansé® S provides natural-looking and long-lasting wrinkle or volume correction to the skin.

This product instantly adds volume and, as it gradually breaks down and is replaced with collagen, patients should continue to enjoy the results of their anti-aging treatment. In most patients, results should last for about 1 year.

## ETERMIS® 3

Merz Aesthetics

### Active Composition

23mg/ml hyaluronic acid, mannitol

### Package Includes

2x1ml prefilled syringes, 4x27G 1/2" needles

### Product Summary

Etermis® 3 contains hyaluronic acid, which helps hold moisture within the skin to restore volume while mannitol acts as an antioxidant.

The Etermis® product range offers what you need to achieve beautiful results in the treatment of fine lines, moderate and severe wrinkles. Etermis® 3 is specially designed for moderate wrinkles (nasolabial folds and marionette lines) and lip enhancement.

Results last for up to to 1 year.

## ETERMIS® 4

Merz Aesthetics

### Active Composition

24mg/ml hyaluronic acid, mannitol

### Package Includes

2x1ml prefilled syringes, 2x27G 1/2" needles and 2x25G 1" needles

### Product Summary

Etermis® 4 contains hyaluronic acid, which helps hold moisture within the skin to restore volume while mannitol acts as an antioxidant.

The Etermis® product range offers what you need to achieve beautiful results in the treatment of fine lines, moderate and severe wrinkles. Etermis® 4 is specially designed for deep and severe wrinkles (nasolabial folds and marionette lines) and lip enhancement.

Results last for up to to 1 year.

## FILORGA ART FILLER FINE LINES

Laboratoires Filorga

### Active Composition

Hyaluronic acid (20mg/ml), lidocaine (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x30G1/2" needles

### Product Summary

Filorga ART Filler Fine Lines with Lidocaine contains hyaluronic acid, known for its hydrating and volume-restoring properties, and Lidocaine, known for its anesthetic properties.

Filorga ART Filler Fine Lines with Lidocaine can be used to sculpt and fill skin, improving its density and texture for a more youthful appearance. Administer this long-lasting cosmetic filler to improve the look of fine lines such as crow's feet and perioral lines.

## FILORGA ART FILLER LIPS

Laboratoires Filorga

### Active Composition

Hyaluronic acid (25mg/ml), lidocaine (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x27G1/2" needles

### Product Summary

Filorga ART Filler Lips with Lidocaine contains hyaluronic acid, known for its hydrating and volume-restoring properties, and Lidocaine, known for its anesthetic properties.

Use this dermal filler to sculpt and fill lips, improving their volume and texture for a more youthful appearance. Administer this long-lasting cosmetic filler in the lips to add plumpness or improve shape, or into the dermis to correct medium to deep skin depressions.

## FILORGA ART FILLER UNIVERSAL

Laboratoires Filorga

### Active Composition

Hyaluronic acid (25mg/ml), lidocaine (3mg/ml)

### Package Includes

2x1.2ml prefilled syringes, 4x27G1/2" needles

### Product Summary

Filorga ART Filler Universal with Lidocaine contains hyaluronic acid, known for its hydrating and volume-restoring properties, and Lidocaine, known for its anesthetic properties.

Use this dermal filler to sculpt and fill skin, improving its density and texture for a more youthful appearance. Administer this long-lasting cosmetic filler in the medium or deep dermis to correct medium to deep skin depressions or to plump lips and enhance their outline.

## FILORGA ART FILLER VOLUME

Laboratoires Filorga

### Active Composition

Hyaluronic acid (25mg/ml), lidocaine (3mg/ml)

### Package Includes

2x1.2ml prefilled syringes, 4 sterile 25G1/2" needles

### Product Summary

Filorga ART Filler Volume with Lidocaine contains hyaluronic acid, known for its hydrating and volume-restoring properties, and Lidocaine, known for its anesthetic properties.

Use this dermal filler to sculpt and fill skin, improving its density and texture for a more youthful appearance. Administer this long-lasting cosmetic filler sub-cutaneously or supra-periosteally, or into the deep dermis, to restore volume to aging facial features.

## FILORGA® M-HA 18®

Laboratoires Filorga

### Active Composition

Free Hyaluronic Acid (18mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x30G 1/2 treatment needles

### Product Summary

FILORGA® M-HA18® is a sterile, viscoelastic, clear, colorless, transparent, isotonic, biodegradable and injectable gel. It is composed of non-animal sodium hyaluronate, obtained from biofermentation.

It is intended for replenishing the loss of hyaluronic acid due to aging. It is designed to improve tone and elasticity of the skin and/or to act as a filler for small lines such as crow's feet, smile lines or smoke lines surrounding the mouth.

Most patients find they need to return for a follow-up FILORGA® M-HA 18® cosmetic treatment about every 6 months to a year to maintain their rejuvenated skin.

## FILORGA® X-HA® VOLUME

Laboratoires Filorga

### Active Composition

Free Hyaluronic Acid (23mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x27G1/2 needles

### Product Summary

It is a sterile, biodegradable, viscoelastic, clear, colorless, isotonic, and homogenized injectable gel. It consists of cross-linked hyaluronic acid produced by Streptococcus equi bacteria, formulated to a concentration of 23mg/ml in a physiological buffer.

It is meant to be used on patient's cheeks, chin, face ovale, and temporal area to can restore their sagging, hollow skin to a more youthful fullness. You can also use Filorga® X-HA® Volume to sculpt and enhance areas of your patient's face, such as their cheekbones, to give their facial features more definition.

Results usually last about 12 to 18 months.

## INTRALINE® 1

Bohus Bio Tech AB

### Active Composition

Cross-linked hyaluronic acid (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 2x27G 1/2" needles

### Product Summary

Intraline® 1 is an injectable gel for correcting moderate wrinkles, including frown lines, nasolabial folds, lip commissure, and cupid's bow.

The hyaluronic acid particles are spherically-shaped, so that as they hold moisture to add volume within the dermis, they maintain a smooth texture. This helps support skin and smooth the look of wrinkles with natural-looking results. This dermal filler is suitable for use on skin with signs of aging.

## INTRALINE® 2

Bohus Bio Tech AB

### Active Composition

Cross-linked hyaluronic acid (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 2x27G 1/2" needles

### Product Summary

Intraline® 2 is made of spherical hyaluronic acid particles, known for their hydrating and volume-adding properties and their ability to help stimulate collagen growth.

Use this dermal filler to correct deep wrinkles or restore volume, restoring a smoother look to skin, or for lip augmentation. Administer this injection every year to help maintain smoother skin and more youthful facial volume.

## INTRALINE® FOR MEN

Bohus Bio Tech AB

### Active Composition

Cross-linked hyaluronic acid (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 2x27G 1/2" needles

### Product Summary

Intraline® for Men contains spherical hyaluronic acid particles, known for their hydrating and volume-adding properties and their ability to help stimulate collagen growth.

Use this dermal filler to help correct deep wrinkles, smoothing the look of skin, or to help restore volume and contour to facial features. Administer this injection every year to help men maintain smoother skin and more youthful facial volume.

## JALUPRO®

Professional Derma SA

### Active Composition

30mg sodium hyaluronate, 3ml water for injection, 50mg glycine, 376mg L-proline, 54mg L-lysine monohydrochloride, 7mg L-leucine

### Package Includes

2 vials with 30mg of sterile Sodium hyaluronate, 2 ampoules with 100mg of a mixture of freeze-dried amino acids

### Product Summary

Jalupro® is a dermal filler made of sodium hyaluronate, but it has the added benefit of the amino acids.

Jalupro® is intended for the correction of defects in the following areas of the face: nasolabial creases; increase of the lips; crow's feet; wrinkles at the sides of the lips; acne scars; glabella wrinkles; frontal wrinkles; increase of the cheek bones.

The anti-aging effects will last for 6 months, but this can be extended if your patients return for a treatment monthly.

## JALUPRO® HMW

Professional Derma SA

### Active Composition

syringe: 20mg of sodium hyaluronate, bottle: 80mg of a sterile solution of amino acids (glycine, L-proline, L-Leucine, L-lysine HCL)

### Package Includes

1x1.5ml syringe, 1x1ml bottle

### Product Summary

Jalupro® HMW contains sodium hyaluronate, known for its hydrating and volume-adding properties and its ability to stimulate collagen, and amino acids, which help provide nutritional support to fibroblasts as they produce collagen.

Use this dermal filler to correct the appearance of moderate to severe wrinkles while refreshing and enhancing skin for a more youthful appearance. Administer this dermal filler twice a year to maintain youthful-looking skin.

## JUVÉDERM® ULTRA 2

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2 x 0.55ml prefilled syringes, 2 sterile 30G1/2" needles

### Product Summary

Juvéderm® Ultra 2 is a sterile, pyrogenic-free, physiological solution of cross-linked hyaluronic acid gel which is not of animal origin.

Juvéderm® Ultra 2 is most effective on your patients with moderate to severe lines and wrinkles on their face including: marionette lines; smile lines; nasolabial folds; parentheses; vertical lip lines; general facial wrinkles.

It gives your patients natural-looking results without visible transitions between the treated and untreated areas of their face for up to 12 months.

## JUVÉDERM® ULTRA 3

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 2 sterile 27G1/2" needles

### Product Summary

Juvéderm® Ultra 3 is produced using Hyalacross Technology, making it highly cross-linked and stable.

Juvéderm® Ultra 3 is formulated to tackle the most severe and deep wrinkles and hollows on your patient's face including: smile lines; marionette lines; vertical lines. Juvéderm® Ultra 3 plumps up cheeks, lips, earlobes and fills acne scars.

It plumps up to about a thousand times its volume, increasing the plumpness of your patient's skin and providing it with moisture. It is long-lasting, up to a year in most patients.

## JUVÉDERM® ULTRA 4

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 2 sterile 27G1/2" needles

### Product Summary

Of non-animal origin, Juvéderm® Ultra 4 is produced using Hyalacross Technology, making it highly cross-linked and stable.

Juvéderm® Ultra 4 corrects deep wrinkles, smooths out nasolabial folds, fills in cheeks and other hollow areas of your patient's face and chin. Juvéderm® Ultra 4 is long-lasting, up to a year in most patients.

Your patients should see an immediate effect, with the results lasting for about a year.

## JUVÉDERM® ULTRA SMILE

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x0.55ml prefilled syringes, 2 sterile 30G1/2" needles

### Product Summary

Juvéderm® Ultra Smile is a sterile pyrogenic-free, physiological solution of cross-linked hyaluronic acid gel which is not of animal origin.

Add volume and definition to your patient's thin, lackluster lips with this specialized hydrating filler for up to a year. It is also great for patients who want to give their lips more definition along the vermillion border, smooth out the lines and wrinkles or simply need more hydration.

Results last for up to 12 months.

## JUVÉDERM® ULTRA XC

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2 x 0.55ml prefilled syringes, 2 sterile 30G1/2" needles

### Product Summary

Juvéderm® Ultra XC is a sterile, pyrogenic-free, physiological solution of cross-linked hyaluronic acid gel which is not of animal origin.

Juvéderm® Ultra XC is most effective on your patients with moderate to severe lines and wrinkles on their face including: marionette lines; smile lines; nasolabial folds; parentheses; vertical lip lines; general facial wrinkles.

It gives your patients natural-looking results without visible transitions between the treated and untreated areas of their face for up to 12 months.

## JUVÉDERM® ULTRA PLUS XC

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml), lidocaine hydrochloride (3mg/ml)

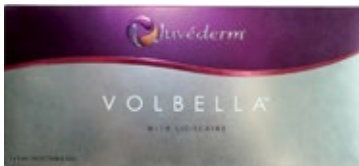

### Package Includes

2x1ml prefilled syringes, 2 sterile 27G1/2" needles

### Product Summary

Juvéderm® Ultra Plus XC is produced using Hyalacross technology, making it highly cross-linked and stable. Juvéderm® Ultra Plus XC is formulated to tackle the most severe and deep wrinkles and hollows on your patient's face including: smile lines; marionette lines; vertical lines. Juvéderm® Ultra Plus XC plumps up cheeks, lips, earlobes and fills acne scars.

It plumps up to about a thousand times its volume, increasing the plumpness of your patient's skin and providing it with moisture. It is long-lasting, up to a year in most patients.

## JUVÉDERM® VOLBELLA WITH LIDOCAINE

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (15mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1x1ml prefilled syringe, 2 sterile 30G1/2" needles

### Product Summary

Juvéderm® Volbella is manufactured using Vycross® Technology for strong cross-linked molecular properties resulting in longer-lasting aesthetic effects.

A great choice for any of your patients that want to enhance their lips by: defining the cupid's bow on the top of their lips; enhancing their vermillion border which is the outline of the lips; adding volume to their lips; smoothing out smoker's lines.

Results last for up to 12 months.

## JUVÉDERM® VOLIFT WITH LIDOCAINE

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (17.5mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

Juvéderm® Volift with Lidocaine is a smooth, highly cross-linked hyaluronic acid formula, manufactured using Allergan's Vycross® Technology.

It is indicated for nasolabial folds; other deep facial lines; wrinkles; hollows. You can also add volume to your patient's skin, lift sagging skin or contour facial features. Juvéderm® Volift with Lidocaine can also be used for enhancement and pouting of the lips, to correct structural defects such as asymmetry, contour deformities, volume loss, etc.

Instantly give your patients smooth, natural and younger-looking skin for up to 15 months.

## JUVÉDERM® VOLIFT RETOUCH

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (17.5mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x0.55ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

Juvéderm® Volift Retouch contains cross-linked hyaluronic acid, produced using Vycross® Technology.

Use Juvéderm® Volift Retouch to treat patients who have already had a Juvéderm® Volift Retouch treatment but just need some touch-up work. Juvéderm® Volift Retouch is suitable for your patients who have deep wrinkles and lines or facial volume loss. When your patients want to extend the life of their Juvéderm® Volift Retouch treatments, you can use Juvéderm® Volift Retouch to top up the hyaluronic acid in their skin.

Results are immediate and can last up to about 15 months. Your patients should return about every year for a Juvéderm® Volift Retouch treatment to maintain their results.

## JUVÉDERM® VOLITE WITH LIDOCAINE

### Active Composition

Hyaluronic acid gel (12mg/ml), lidocaine (0.3%)

### Package Includes

2x1ml prefilled syringes

### Product Summary

Juvéderm® Volite is an injectable gel made from hyaluronic acid with patented Vycross® Technology, plus additional lidocaine for comfort.

It improves hydration, elasticity and smoothness of skin in the face, neck, décolletage and back of the hands.

It is Allergan's first product specially formulated to eliminate the need for multiple treatments. Results last up to 9 months after 1 session.

## JUVÉDERM® VOLUMA WITH LIDOCAINE

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 2 sterile 27G1/2" needles

### Product Summary

Juvéderm® Voluma with Lidocaine is a long-lasting, clear facial filler made from hyaluronic acid using Hyalacross™ Technology, created specially for use in your patient's cheeks.

Juvéderm® Voluma with Lidocaine is intended for replacing lost cheek volume, smoothing skin and lifting saggy skin back up into place, as well as correcting premature aging.

Give your patients full cheeks and a more youthful look for up to 18 months.

## PERFECTHA® COMPLEMENT

ObvieLine

### Active Composition

Hyaluronic acid gel (20mg/ml)

### Package Includes

1x0.8ml prefilled syringe, 2 sterile 30G 1/2" needles

### Product Summary

Perfectha® Complement is a temporary dermal filler made of cross-linked hyaluronic acid. This hyaluronic acid is produced using E-brid® Technology, which helps form covalent bonds within and between particles of hyaluronic acid, resulting in a cross-linked structure.

Use Perfectha® Complement to add volume within the skin. Patients may not always get the results they desire from botulinum toxin injections or chemical peels, and the results may not last, so doctors use Perfectha® Complement to touch up the results. This dermal filler adds small amounts of volume to the skin, so small adjustments can be made.

Results last for about 4 to 6 months.

## PERFECTHA® DEEP

ObvieLine

### Active Composition

Hyaluronic acid gel (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 2 sterile 27G1/2" needles

### Product Summary

Sinclair Pharma uses E-brid® Technology to cross-link the hyaluronic acid, forming covalent bonds between and within the particles, and this technology results in hyaluronic acid that has undetectable levels of BDDE, a cross-linking agent.

Use Perfectha® Deep to fill deep wrinkles, such as the nasolabial folds. Perfectha® Deep can also help contour the cheeks, chin, and overall face. It can help contour and add volume to the lips for greater definition.

Perfectha® Deep usually lasts between 8 and 12 months.

## PERFECTHA® DERM

ObvieLine

### Active Composition

Hyaluronic acid gel (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 2 sterile 30G1/2" needles

### Product Summary

Sinclair Pharma uses E-brid® Technology to cross-link the hyaluronic acid, forming covalent bonds between and within the particles, and this technology results in hyaluronic acid that has undetectable levels of BDDE, a cross-linking agent.

Use Perfectha® Derm to correct the appearance of moderate wrinkles from premature aging. Perfectha® Derm is suitable for your patient's frown lines, deeper furrows around the eyes and mouth, and other wrinkles and creases. You can also use it to add volume and definition to the lips.

The results of a treatment usually last around 6 to 12 months.

## PERFECTHA® FINE LINES

ObvieLine

### Active Composition

Hyaluronic acid gel (20mg/ml)

### Package Includes

1x0.5ml prefilled syringe, 2 sterile 30G1/2" needles

### Product Summary

Perfectha® Fine Lines is made of non-animal, cross-linked hyaluronic acid, produced using E-brid® Technology that results in undetectable BDDE levels.

Use it to correct fine lines and superficial wrinkles. These include crow's feet, perioral wrinkles, smile lines and lines on the forehead. With a concentration of 180,000 gel particles/ml, Perfectha® Fine Lines can provide just enough volume within the skin to smooth the look of fine lines without over-filling.

Treatment results usually last around 4 to 6 months.

## PERFECTHA® SUBSKIN

ObvieLine

### Active Composition

Hyaluronic acid gel (20mg/ml)

### Package Includes

3x1ml prefilled syringes, 9 sterile 27G 1/2" needles

### Product Summary

Perfectha® Subskin is an injectable dermal filler made of cross-linked hyaluronic acid. This non-animal hyaluronic acid is created using a special technology so BDDE levels are undetectable in the filler.

Use it to restore or create volume in areas such as the jaw, chin, cheeks, and hands. This can smooth the look of skin affected by premature aging, reduce the appearance of scars and other skin depressions, or sculpt facial features for a more defined look. You can also use Perfectha® Subskin to correct facial atrophy or to reshape the nose, an alternative to rhinoplasty.

Results usually last between 12 and 18 months.

## PLURIAL®

MD Skin Solutions

### Active Composition

Cross-linked sodium hyaluronate (23mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x27G1/2" needles

### Product Summary

Pluryal® is a highly elastic dermal filler made of cross-linked sodium hyaluronate in a concentration of 23mg/ml. The gel comes in a syringe that is ergonomically designed for comfortable use.

Use it to correct moderate to severe facial wrinkles, such as the nasolabial folds, marionette lines and glabellar lines, or to add volume to the lips.

Results usually last between 6 and 12 months for wrinkles or about 6 months for lip augmentation.

## PLURIAL® CLASSIC WITH LIDOCAINE

MD Skin Solutions

### Active Composition

Sodium hyaluronate (23mg/ml) and lidocaine hydrochloride (0.3%)

### Package Includes

1x1ml prefilled syringes, 2x27G1/2" needles

### Product Summary

Pluryal Classic with Lidocaine contains monophasic cross-linked hyaluronic acid, known for its hydrating and volume-restoring properties, and Lidocaine, known for its anesthetic properties, with low levels of endotoxins. Use this dermal filler to fill skin, improving its density and texture for a more youthful appearance. Administer this cosmetic filler every 6 to 9 months in glabellar lines, nasolabial folds, or marionette lines to improve skin texture, or in lips to improve volume and contour.

## PLURIAL® VOLUME

MD Skin Solutions

### Active Composition

Cross-linked sodium hyaluronate (23mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x27G1/2" needles

### Product Summary

Pluryal® Volume is a highly elastic dermal filler made of cross-linked sodium hyaluronate in a concentration of 23mg/ml.

It can be used for glabella lines, cheeks, nasolabial folds, bottom corners of the mouth, and lower chin. Use it to add or restore volume to the lips or cheeks, sculpt the chin or jawline (mandibular), or reshape the nose as an alternative to rhinoplasty. It is also suitable for restoring volume and smoothing wrinkles on the backs of the hands. Although it is not suitable for treating deep wrinkles, it can help correct minor damage, usually helping patients between the ages of about 20 to 40.

Results usually last at least a year.

## PLURIAL® VOLUME WITH LIDOCAINE

MD Skin Solutions

### Active Composition

Sodium hyaluronate (23mg/ml) and lidocaine hydrochloride (0.3%)

### Package Includes

1x1ml prefilled syringes, 2x27G1/2" needles

### Product Summary

Pluryal Volume with Lidocaine contains monophasic cross-linked hyaluronic acid, known for its hydrating and volume-restoring properties, and lidocaine, known for its anesthetic properties, with low levels of endotoxins. Use this dermal filler to fill and contour skin, improving its volume and shape for a more youthful appearance. Administer this cosmetic filler every 6 to 12 months in the lips, cheeks, nose, mandibular area, chin, or back of the hands to restore volume and contour.

## PRINCESS® FILLER

CROMA GmbH

### Active Composition

Cross-linked sodium hyaluronate 23mg/ml, sodium chloride, phosphate buffer pH 6.8-7.6 qs

### Package Includes

1x1ml syringe, 2x27G x 1/2" needles

### Product Summary

Princess® Filler is an injectable dermal filler made of hyaluronic acid. The hyaluronic acid in is cross-linked using the patented Supreme Monophasic and Reticulated Technology (S.M.A.R.T.), producing a dense 3-dimensional structure that is resistant to breaking down for longer-lasting results.

Use it for glabellar lines, marionette lines, perioral wrinkles or nasolabial folds. It can also be used to replace volume lost from the lips or to add volume for enhancing lips.

Your patients should enjoy the results of their Princess® Filler injection for about 6 to 10 months.

## PRINCESS® FILLER WITH LIDOCAINE

CROMA GmbH

### Active Composition

Sodium hyaluronate (23mg/ml) and lidocaine hydrochloride (0.3%)

### Package Includes

1x1ml syringe, 2x27G1/2" needles

### Product Summary

Princess Filler with Lidocaine contains hyaluronic acid, known for its hydrating and volume-restoring properties, and lidocaine, known for its anesthetic properties.

Use this dermal filler to fill skin, improving its density and texture for a more youthful appearance. Administer this cosmetic filler every 6 to 9 months in moderate to severe wrinkles, including forehead furrows, glabellar lines, and perioral wrinkles, or in the lips to improve volume and contour.

## PRINCESS® VOLUME

CROMA GmbH

### Active Composition

Highly cross-linked sodium hyaluronate (23mg/ml), sodium chloride

### Package Includes

1x1ml syringe, 2x27G1/2" needles

### Product Summary

Princess® Volume is a sterile biodegradable, viscoelastic, clear, isotonic and homogenized injectable gel implant. The hyaluronic acid is processed using patented Supreme Monophasic and Reticulated Technology (S.M.A.R.T.) to produce a dense, 3-dimensional matrix of hyaluronic acid that is resistant to breaking down within the skin.

Use it to correct the appearance of nasolabial folds, marionette lines, or other deep creases, wrinkles, and scars. You can also use it to fill in facial depressions and to restore or add volume to the cheeks, cheekbones, and chin for a more sculpted look.

Results usually last for about 8 to 12 months.

## PROFHILO® H+L

IBSA

### Active Composition

High molecular weight hyaluronic acid (H-HA) (32mg/ml) and low molecular weight hyaluronic acid (L-HA) (32mg/ml)

### Package Includes

1x2ml prefilled syringe, 2x29G1/2" needles

### Product Summary

Profhilo H+L contains high and low molecular weight hyaluronic acid, known for their hydrating and volume-restoring properties.

Use this dermal filler to fill skin, improving its density and texture for a more youthful appearance. Administer this cosmetic filler to correct wrinkles and skin laxity on the jowls, cheeks, temples, forehead, hands, inner arms, and neck.

## RADIESSE® .8ML

Merz Aesthetics

### Active Composition

Synthetic calcium hydroxylapatite

### Package Includes

1x0.8cc prefilled syringe, 2 sterile 28G3/4" TW needles

### Product Summary

You can use Radiesse® Moderate Fill .8cc in the same way as hyaluronic acid-based dermal fillers to correct your patient's wrinkles and add volume to their facial features.

Ideal for: reduction of aging signs; correction of facial fat loss; deletion of severe-looking facial lines; correction of marionette lines; correction of smile lines; correction of frown lines; correction of chin wrinkles; lifting of sagging skin.

The calcium-based microspheres in Radiesse® act as a scaffold, allowing collagen to form and maintain the skin's structure for longer. This makes Radiesse® longer-lasting than other dermal fillers, lasting a year or longer in most patients.

## RADIESSE® .8ML WITH LIDOCAINE

Merz Aesthetics

### Active Composition

Synthetic calcium hydroxylapatite, lidocaine

### Package Includes

1x0.8cc prefilled syringe, 2 sterile 28G3/4" TW needles

### Product Summary

Use Radiesse® .8cc with Lidocaine in the same way as hyaluronic acid-based dermal fillers to correct wrinkles and add volume to facial features.

Ideal for: reduction of aging signs; correction of facial fat loss; deletion of severe-looking facial lines; correction of marionette lines; correction of smile lines; correction of frown lines; correction of chin wrinkles; lifting of sagging skin.

The calcium-based microspheres act as a scaffold, allowing collagen to form and maintain the skin's structure for longer. Results last about 1 year or even longer in most patients.

**RADIESSE® 1.5ML**

Merz Aesthetics

**Active Composition**

Synthetic calcium hydroxylapatite

**Package Includes**

1x1.5ml prefilled syringe, 2 sterile 28G3/4" TW needles

**Product Summary**

Use Radiesse® 1.5cc like hyaluronic acid-based dermal fillers to correct wrinkles and add volume. However, Radiesse® 1.5cc can also treat vocal cord deficiencies as well as periodontal, cystic, and other oral and maxillofacial defects.

It is used to correct facial fat loss, diminish severe-looking facial lines, marionette lines, smile lines, chin wrinkles, and lift sagging skin.

The calcium-based microspheres in Radiesse® act as a scaffold, encouraging collagen formation and maintaining skin structure for longer. This makes Radiesse® longer-lasting than other dermal fillers, lasting up to 2 years in most patients.

**RADIESSE® 1.5ML WITH LIDOCAINE**

Merz Aesthetics

**Active Composition**

Synthetic calcium hydroxylapatite, lidocaine

**Package Includes**

1x1.5cc prefilled syringe, 2x27G0.75" TW needles

**Product Summary**

Radiesse® 1.5ml with Lidocaine is a transparent, sterile, injectable gel made of calcium hydroxylapatite particles. Use it to reduce the look of facial folds and wrinkles, like nasolabial folds, radial lip lines and marionette lines. It can also restore shallow cheeks caused by fat atrophy; fill acne scars and other depressions or blemishes; contour the jawline; correct indentations or unevenness on the nose or chin; and reduce the look of bones and veins on aging hands. As an alternative to rhinoplasty or other plastic surgery, it corrects imperfections. Doctors have used it to correct lipoatrophy in HIV patients.

Results usually last around 18 months or longer.

**RESTYLANE® .5ML WITH LIDOCAINE**

Q-Med AB

**Active Composition**

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml), lidocaine hydrochloride (3mg/ml)

**Package Includes**

1x0.5ml prefilled syringe, 1 sterile 29G1/2" needle

**Product Summary**

Restylane® 0.5ml with Lidocaine is a sterile, transparent gel of stabilized hyaluronic acid of non-animal origin with the addition of 0.3% lidocaine hydrochloride.

Restylane® with Lidocaine has a moderate particle size in its hyaluronic acid gel, so it is suitable for medium wrinkles and creases. It can smooth the look of crow's feet, frown lines which are also known as forehead wrinkles, nasolabial folds, and melomental folds. You can use it to correct the appearance of orbital troughs under the eyes or to enhance volume or contour the lips.

Results of wrinkle treatment last for about 6 to 12 months, or about 6 to 9 months for lip augmentation.

## RESTYLANE® 1ML

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 2x29G1/2" needles

### Product Summary

A sterile transparent gel of stabilized hyaluronic acid derived from non-animal sources, which continues to be 1 of the most popular volumizing dermal fillers in clinics and medical spas around the world.

Restylane® 1ml is a good overall dermal filler that can be used for correction and reduction of: frown lines; melomental folds; nasolabial folds; crow's feet; orbital troughs under and around your patient's eyes; age-related facial hollows in the cheeks and other areas; skin artifacts found on the forehead, chin and nose.

Results last up to 6 months. With top-ups, results can be extended for up to 18 months.

## RESTYLANE® 1ML WITH LIDOCAINE

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1x1ml prefilled syringe, 2x29G1/2" needles

### Product Summary

It is a sterile, transparent gel of stabilized hyaluronic acid of non-animal origin with the addition of 0.3% lidocaine hydrochloride.

Restylane® 1ml with Lidocaine is a dermal filler for correction and augmentation of: moderate to severe lines and wrinkles on your patient's mature skin; nasolabial folds; melomental folds; frown lines on your patient's forehead; crow's feet; other deep lines and wrinkles; orbital troughs under and around your patient's eyes; other age-related facial hollows; plumping and shaping of lips.

Results last up to 6 months. With top-ups, results can be extended for up to 18 months.

## RESTYLANE® DEFYNE (EMERVEL® DEEP)

Q-Med AB

### Active Composition

Cross-linked hyaluronic acid (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1 prefilled syringe of 1ml, 2x27G1/2" sterile needles

### Product Summary

Restylane® uses Optimal Balance Technology™ to adjust the level of cross-linking, creating a softer or firmer gel for different applications. They also pass the Restylane® gel through different sizes of mesh to sort out particle sizes, using the larger particles and firmer gel for deeper dermal fillers like Restylane® Defyne.

With its particular particle size, Restylane® Defyne is suitable for injections into deep wrinkles and folds, including marionette lines and nasolabial folds. Restylane® Defyne can help fill these deep skin defects to give the skin a smoother appearance.

The results of Restylane® Defyne treatment can last for about 6 to 9 months, and sometimes even 12 months.

## RESTYLANE® KY SSE (EMERVEL® LIPS)

Q-Med AB

### Active Composition

Hyaluronic acid (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1 prefilled syringe of 1ml, 2x30G1/2" sterile needles

### Product Summary

Restylane® Kysse™ contains cross-linked hyaluronic acid that has been passed through a sieve. This Optimal Balance Technology™ helps create just the right size of hyaluronic acid particle to smoothly fill the lips, without adding free hyaluronic acid to the gel.

Injecting Restylane® Kysse™ can plump the lips to their youthful size while defining the lip borders and hydrating the lips.

The results are immediate and can last for about 6 to 9 months, and up to a year. However, this does vary from patient to patient. Your patients should generally maintain their plump lips by returning to your clinic once or twice a year for another set of injections.

## RESTYLANE® LYFT (PERLANE) 1ML

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 2 sterile 29G1/2" needles

### Product Summary

Restylane® Lyft 1ml is a sterile, transparent gel of stabilized hyaluronic acid of non-animal origin.

It is used to correct nasolabial folds, fill in cheeks and other facial depressions, improve the hollows around the eyes, soften acne scars or other scars, decrease fine lines around the lips, forehead, nose and mouth, and correct other creases and wrinkles on your patient's face. Restylane® Lyft 1ml is a great choice for both women and men. Results last up to 6 months.

## RESTYLANE® LYFT (PERLANE) 1ML WITH LIDOCAINE

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1x1ml prefilled syringe, 2 sterile 29G1/2" needles

### Product Summary

Restylane® Lyft 1ml with Lidocaine is a sterile, transparent gel of stabilized hyaluronic acid of non-animal origin with the addition of 0.3% lidocaine hydrochloride.

It is ideal for severe lines, deep wrinkles and creases. Restylane® Lyft is the thickest formula in the Restylane® product line, so you would inject it deep within your patient's dermis to correct deep nasolabial folds and marionette lines. You can also use it to enhance your patient's cheeks and other minor to moderate facial contouring.

Results last up to 6 months.

## RESTYLANE® LYPST™ WITH LIDOCAINE

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1x1ml prefilled syringe, 2 sterile 29G1/2" needles

### Product Summary

Restylane® Lyps™ with Lidocaine is a sterile, transparent, biodegradable gel of stabilized hyaluronic acid of non-animal origin with the addition of 0.3% lidocaine hydrochloride.

Unlike a general dermal filler, Restylane® Lyps™ with Lidocaine was created to stand up to the wear-and-tear your patient's lips go through in a day. It is soft enough to use in the delicate lip area but tough enough to withstand the constant movement from talking, smiling, and eating. It can be used to enhance the vermilion border and give your patient's lips definition, or in the center of your patient's lips to make them plumper.

For most patients, results last about 6 months.

## RESTYLANE® PERLANE .5ML WITH LIDOCAINE

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20 mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1x0.5ml prefilled syringe, 1 sterile 29G1/2" needle

### Product Summary

Restylane® Perlane .5ml with Lidocaine is a sterile, transparent, hyaluronic acid gel with an added anesthetic for comfort.

It smooths the appearance of deep facial lines and creases, such as nasolabial folds.

Results are immediately visible, and they usually last for about 6 months.

## RESTYLANE® REFYNE (EMERVEL® CLASSIC)

Q-Med AB

### Active Composition

Cross-linked hyaluronic acid (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1 prefilled syringe of 1ml, 2x30G1/2" sterile needles

### Product Summary

The makers of Restylane® Refyne use Optimal Balance Technology™ to vary the levels of cross-linking in their different products as well as the particle sizes. This helps to create a dermal filler that lasts longer before breaking down within the skin as well as products that have different applications depending on their softness.

The softness and particle size makes it suitable for treating your patients who have moderate lines and wrinkles, such as the nasolabial folds.

This volume of the dermal filler fills in moderate lines and wrinkles and gives your patients immediately visible results. The results will usually last between 6 and 9 months, and even up to 12 months.

## RESTYLANE® SUBQ™ 2ML

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml)

### Package Includes

1x2ml prefilled syringe

### Product Summary

Restylane® SubQ™ is a sterile, transparent, stabilized large-particle hyaluronic acid gel dermal filler of non-animal origin, ideal for giving volume and definition to your patients' facial features.

It is recommended to be used for shaping the contours of the face. It can plump up your patient's flat cheeks, enhance their cheekbones, sculpt their chin and jawline, plump up their chin, and help give your patients a neck lift.

Effects last up to a year. In time, it will undergo isovolemic degradation, which means that the product maintains its volume even during degradation. A blunt cannula with side exit, within the range of 16–21G is recommended. The recommended needle size is 21G.

## RESTYLANE® VOLYME (EMERVEL® VOLUME)

Q-Med AB

### Active Composition

Cross-linked Hyaluronic Acid 20mg/ml, lidocaine hydrochloride 3mg/ml

### Package Includes

1 prefilled syringe of 2ml, 2x23G 1" sterile needles

### Product Summary

Restylane® Volyme™ is an injectable, viscoelastic gel made of non-animal, cross-linked hyaluronic acid as well as Lidocaine for pain relief. Restylane® Volyme™ is cross-linked to resist breaking down within the skin.

With its high volume content and lifting effect, Restylane® Volyme™ can help patients who want to enhance their facial volume or recontour their facial features, enhancing their cheeks, cheekbones, chin, or their entire facial oval.

The results of 1 treatment can last about 6 to 9 months, and possibly even as long as 12 months. The results of an injection are immediate as the hyaluronic acid instantly binds moisture within the skin to create volume.

## REVANESSE®

Prollenium Medical Technologies Inc

### Active Composition

Cross-linked hyaluronic acid (25mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x27G needles

### Product Summary

Revanesse contains hyaluronic acid, known for its hydrating and volume-restoring properties.

Use this dermal filler to fill skin, improving its density and texture for a more youthful appearance. Administer this cosmetic filler to correct fine lines and superficial imperfections such as crow's feet, periorbital lines, forehead wrinkles, and glabellar lines.

## REVANESSE® KISS

Prolenium Medical Technologies Inc

### Active Composition

Cross-linked hyaluronic acid (25mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x27G needles

### Product Summary

Revanesse Kiss contains hyaluronic acid, known for its hydrating and volume-restoring properties.

Use this dermal filler to fill lips, increasing their volume and improving their texture for a more youthful appearance.

Administer this cosmetic filler for lip augmentation and to improve lip definition.

## REVANESSE® PURE

Prolenium Medical Technologies Inc

### Active Composition

Hyaluronic acid (14mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x30G1/2" needles

### Product Summary

Revanesse Pure contains hyaluronic acid, known for its hydrating properties.

Use this mesotherapy treatment to rehydrate skin, improving its texture, elasticity, and brightness for a more youthful appearance. Administer this cosmetic injection in the neck, face, décolletage, and hands using a mesotherapy technique.

## REVANESSE® ULTRA

Prolenium Medical Technologies Inc.

### Active Composition

25mg/ml of cross-linked and high viscosity hyaluronic acid in phosphate buffered saline

### Package Includes

2x1ml prefilled syringes, 4 single-use needles

### Product Summary

Revanesse Ultra is a thick and highly viscous hyaluronic acid-based injectable gel, known for its hydrating and volume-restoring properties.

Revanesse Ultra is designed to correct pronounced deep-set facial lines and wrinkles such as nasolabial folds and oral commissures. It is also perfect for volumizing sunken facial areas like the cheeks for a more youthful appearance.

Administer this volumizing filler via mid to deep dermis injections in problematic areas. The skin smoothing and volumizing effects could last for about 9 to 12 months.

## REVOFIL® AQUASHINE SOFT FILLER

Caregen

### Active Composition

Hyaluronic acid (15mg/ml)

### Package Includes

1x2ml prefilled syringe

### Product Summary

Revofil® Aquashine Soft Filler is a combination dermal filler and mesotherapy injection, made of non-crosslinked hyalurononic acid and a skin rejuvenating complex with vitamins and amino acids.

Use it for moderate to severe facial wrinkles and folds, such as nasolabial folds, and for restoring facial shape. This dermal filler and mesotherapy treatment can help revitalize skin that is dull, tired, and aged. You can use Revofil® Aquashine Soft Filler to fill wrinkles, improve skin elasticity, tighten pores and moisturize skin.

Since it is a mesotherapy treatment, you should administer it in 3 sessions 4 weeks apart for the best results.

## REVOFIL® AQUASHINEBR SOFT FILLER

Caregen

### Active Composition

Hyaluronic acid (15mg/ml)

### Package Includes

1x2ml prefilled syringe

### Product Summary

Revofil® AquashineBR Soft Filler is a transparent, sterile, injectable gel made of hyaluronic acid, minerals and coenzymes, vitamins and amino acids. It is a combination dermal filler and mesotherapy injection.

Created in South Korea, this filler can help correct moderate to severe facial wrinkles and folds, and restore facial shape that has changed through aging. You can also use it to help moisturize skin, tighten pores, improve skin elasticity and refresh dull skin. The BR version of Aquashine in particular helps reduce and prevent hyperpigmentation.

Perform 3 treatment sessions at 4 week intervals for the best results.

## REVOFIL® AQUASHINE BTX

Caregen

### Active Composition

Sodium hyaluronate

### Package Includes

1x2ml prefilled syringe

### Product Summary

Aquashine BTX contains sodium hyaluronate, known for its hydrating and volume-restoring properties, and biomimetic peptides, which can help reduce neuron excitability to reduce muscle contractions.

Use this dermal filler to fill skin and relax wrinkles, improving skin density and texture for a more youthful appearance. Administer this cosmetic injection every 14 days for a total of 6 sessions, into the mid to deep dermis of nasolabial folds, forehead wrinkles, perioral wrinkles, vertical wrinkles above the upper lip, or other dynamic wrinkles, or into facial features to restore their volume and shape.

## SCULPTRA®

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (175mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

This suspension contains microparticles of poly-L-lactic acid, the crystalline form of polylactic acid.

Sculptra® was originally developed to treat lipoatrophy in HIV patients. It can correct the look of hollow cheeks, sunken eyes and other hollow areas. It can also be used to correct deep wrinkles in aging patients, smooth out severe lines such as nasolabial folds, and sculpt facial features into an ideal shape. It is a less invasive alternative to plastic surgery.

It is 1 of the most longest-lasting non-permanent ways to produce a non-surgical face lift. Most patients have 3 initial treatments about 3 weeks apart. Results last for up to 2 years or longer.

## STYLAGE® L

Laboratoires VIVACY

### Active Composition

Sodium hyaluronate (20mg/g), mannitol

### Package Includes

2x1ml prefilled syringes, 4x30G1/2" needles

### Product Summary

Stylage® L is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolarity.

Stylage® L is an injectable implant indicated for filling deep to very deep wrinkles and/or for volume restoration (cheeks, contours of the face, cheekbones) by deep dermal injection in the face. It can also be used in techniques for rejuvenating the hands by sub-cutaneous injection in the back of the hand.

Results last for about 12 months.

## STYLAGE® L WITH LIDOCAINE

Laboratoires VIVACY

### Active Composition

Sodium hyaluronate (24mg/g), mannitol, 03% lidocaine hydrochloride

### Package Includes

2x1ml prefilled syringes, 4x30G1/2" needles

### Product Summary

Stylage® L with Lidocaine is a cross-linked hyaluronic gel, non-animal in origin, which incorporates 0.3% lidocaine hydrochloride, an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolarity.

It is an injectable implant indicated for filling deep to very deep wrinkles and/or for volume restoration (cheeks, contours of the face, cheekbones) by deep dermal injection in the face. It can also be used in techniques for rejuvenating the hands by subcutaneous injection in the back of the hand.

Results last for about 12 months.

**STYLAGE® M**

Laboratoires VIVACY

**Active Composition**

Sodium hyaluronate (20mg/g), mannitol

**Package Includes**

2x1ml prefilled syringes, 4x30G1/2" needles

**Product Summary**

Stylage® M is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolarity.

Stylage® M is an injectable implant indicated for filling medium to deep wrinkles, by injection into the middle dermis or into the deep dermis of the face and/or for enhancing the lip outline and lip augmentation. It can also be used in techniques for rejuvenating the hands by subcutaneous injection in the back of the hand.

Results last up to 12 months before breaking down naturally within the skin.

**STYLAGE® M WITH LIDOCAINE**

Laboratoires VIVACY

**Active Composition**

Sodium hyaluronate (20mg/g), 03% lidocaine hydrochloride, mannitol

**Package Includes**

2x1ml prefilled syringes, 4x30G1/2" needles

**Product Summary**

Stylage® M with Lidocaine is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolarity. It is packed in a 1ml prefilled syringe and sterilized by moist heat autoclaving.

Indicated for filling average to deep wrinkles, by injection into mid-deep dermis of the face/ and or enhancing lip outline and lip volume.

Results last up to 12 months before breaking down naturally within the skin.

**STYLAGE® S**

Laboratoires VIVACY

**Active Composition**

Sodium hyaluronate (16mg/g), mannitol

**Package Includes**

2x0.8ml prefilled syringe, 4x30G1/2" needles

**Product Summary**

Stylage® S is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolarity. It is packed in a 0.8ml prefilled syringe and sterilized by moist heat autoclaving.

It is an injectable implant indicated for filling superficial and average wrinkles by superficial or middle dermal injection and/or for the outline of the lips. It can also be used in techniques for rejuvenating the hands by subcutaneous injection in the back of the hand.

Results last for about 9 months.

## STYLAGE® S WITH LIDOCAINE

Laboratoires VIVACY

### Active Composition

Cross-linked hyaluronic acid (BDDE) 16mg/g, mannitol, lidocaine hydrochloride (3mg)

### Package Includes

2x0.8ml prefilled syringes, 4x30G1/2" needles

### Product Summary

Stylage® S with Lidocaine is a non-animal origin cross-linked hyaluronic gel containing 0.3% lidocaine hydrochloride and mannitol.

It is suitable for treating patients with superficial to average wrinkles. These could include perioral wrinkles, oral commissures or marionette lines, periorbital wrinkles or crow's feet, glabellar lines or frown lines between the eyebrows, and fine cheek wrinkles. You can also use it to treat patients who have dark circles or eye hollows in the tear trough area under their eyes.

Results last for about 9 months.

## STYLAGE® SPECIAL LIPS

Laboratoires VIVACY

### Active Composition

Sodium Hyaluronate (18.5mg/g), mannitol

### Package Includes

1x1ml prefilled syringe, 2x30G1/2" needles

### Product Summary

Stylage® Special Lips is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolarity. It is packed in a 1ml prefilled syringe and sterilized by heat autoclaving.

It is specially designed for enhancement of the lip border and/or augmentation of lip volume.

Results last for about 6 to 9 months.

## STYLAGE® SPECIAL LIPS WITH LIDOCAINE

Laboratoires VIVACY

### Active Composition

Sodium Hyaluronate (18.5mg/g), mannitol, 0.3% lidocaine hydrochloride

### Package Includes

1x1ml prefilled syringe, 2x30G1/2" needles

### Product Summary

Stylage® Special Lips with Lidocaine is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolarity. It is packed in a 1ml prefilled syringe and sterilized by heat autoclaving.

It is specially designed for enhancement of the lip border and/or augmentation of lip volume, while the inclusion of lidocaine serves to increase patient's comfort during the treatment process.

Results last for about 6 to 9 months.

**STYLAGE® XL**

Laboratoires VIVACY

**Active Composition**

Sodium Hyaluronate (26mg/g), mannitol

**Package Includes**

2x1ml prefilled syringes, 2x23G, 2x27G needles

**Product Summary**

Stylage® XL is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolality. It is packed in a 1ml prefilled syringe and sterilized by moist heat autoclaving.

Stylage® XL is an injectable implant indicated for treatment of facial volume defects: restoration or augmentation (cheeks, contours of the face, treatment of slight ptoses, etc.) by deep or sub-cutaneous injection, and also as a filler for deep facial creases and for thick skin. It is also indicated for the treatment of facial lipodystrophy, including patients suffering from HIV.

Results last for about 12 months or more.

**STYLAGE® XL WITH LIDOCAINE**

Laboratoires VIVACY

**Active Composition**

Sodium Hyaluronate (26mg/g), lidocaine hydrochloride, mannitol

**Package Includes**

2x1ml prefilled syringes, 2x23G, 2x27G needles

**Product Summary**

Stylage XL Lidocaine is an injectable implant made from cross-linked hyaluronic gel, non-animal in origin, combined with 0.3% lidocaine hydrochloride and mannitol.

It is indicated for the treatment of facial volume restoration or augmentation of cheeks, facial oval and treatment of slight ptoses by deep dermal or subcutaneous injection. It can also be used as a filler for deep facial creases and for thick skin. As well, it is indicated for facial lipodystrophy (including HIV patients).

Results last for about 12 months or more.

**STYLAGE® XXL**

Laboratoires VIVACY

**Active Composition**

Sodium hyaluronate (21mg/g), mannitol

**Package Includes**

1x2.2ml prefilled syringe, 1x21G cannula and 2x21G needles

**Product Summary**

Stylage® XXL is a cross-linked hyaluronic gel, non-animal in origin, which incorporates an antioxidant (mannitol), is sterile and apyrogenic, with physiological pH and osmolality. It is packed in a 2.2ml prefilled syringe and sterilized by heat autoclaving.

It is an injectable implant indicated for treatment of loss of facial volume with the aim of restoring or augmenting this (e.g. cheeks, facial oval, treatment of ptoses, etc.) with sub-cutaneous or deep dermis injections. It is also indicated in the treatment of facial lipodystrophies including those in patients suffering from HIV.

Results last for about 12 months or more.

## SURGIDERM® 24XP

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml)

### Package Includes

2x0.8ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

Surgiderm® 24XP is cross-linked through a special process that makes it less likely to degrade within your patient's skin, and therefore Surgiderm® 24XP is longer-lasting than other similar dermal fillers.

It is an injectable implant indicated for filling any medium depression of the skin via mid-dermis injection, as well as for definition and pouting of the lips. It is used for correction and augmentation of: severe facial lines; nasolabial folds; marionette lines; lip definition; vermillion border.

Your patients will see immediate results as the hyaluronic acid starts to plump and fill their wrinkled skin, and these results should last around 6 to 9 months.

## SURGIDERM® 30XP

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (24mg/ml)

### Package Includes

2x0.8ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

It is a sterile pyrogen-free non-animal derived physiological solution of crosslinked hyaluronic acid gel, manufactured according to the 3D Hyaluronic Acid Matrix Technology.

You can inject Surgiderm® 30XP into your patient's deep dermis, allowing you to smooth out the deepest wrinkles and facial folds in their mature skin. You can also use it to fill in hollow areas of your patient's face such as their cheeks, eye area, forehead, chin, and the areas around mouth and lips.

Your patient will generally enjoy smooth, plump skin and sculpted facial features for about 6 to 9 months.

## TEOSYAL® DEEP LINES

Teoxane Laboratories

### Active Composition

Reticulated hyaluronic acid (25mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

It is a transparent, non-pyrogenic, visco-elastic gel of reticulated hyaluronic acid derived from non-animal precursors.

Teosyal® Deep Lines can help restore skin to a more youthful texture, help patients of any age who want to have fuller cheeks or want to have other facial features enhanced, such as their jaw line, or that want to reduce the look of severe lines such as deep facial furrows. You can also use it to augment or define your patient's lips.

The hyaluronic acid goes to work immediately to hydrate and plump your patient's skin. Most patients should continue to enjoy smoother skin for about 6 to 9 months.

## TEOSYAL® GLOBAL ACTION

Teoxane Laboratories

### Active Composition

Reticulated hyaluronic acid (25mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

It is a transparent, non-pyrogenic, visco-elastic gel of reticulated hyaluronic acid, of non animal origin.

Teosyal® is considered to be 1 of the longer-lasting dermal filler brands. The technology used to make Teosyal® Global Action helps reduce the protein and bacterial endotoxin levels, resulting in less hypersensitivity. Teosyal® Global Action has medium density, which makes it ideal for injecting into the mid-dermal layer to correct mild to moderate facial lines and wrinkles.

Your patients should continue to enjoy their more evenly-textured skin for about 6 to 9 months.

## TEOSYAL® KISS

Teoxane Laboratories

### Active Composition

Reticulated hyaluronic acid (25mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

It is a transparent highly-cross-linked non-pyrogenic viscoelastic gel of reticulated hyaluronic acid derived from non-animal precursors.

Use it to increase the volume of your patient's lips, reshape the contours of their lips, add support at the corners of their lips, rehydrate their lips and smooth wrinkles around your patient's mouth. With its highly cross-linked formula, Teosyal® Kiss was specially designed to give lips long-lasting shape and plumpness.

It is highly cross-linked, and should last for about 6 to 9 months in most of your patients.

## TEOSYAL® TOUCH UP

Teoxane Laboratories

### Active Composition

Reticulated hyaluronic acid (25mg/ml)

### Package Includes

2x0.5ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

It is a transparent, non-pyrogenic, viscoelastic gel of reticulated hyaluronic acid derived from non-animal precursors. It provides just enough to maintain your patient's wrinkle-free skin texture between aesthetic treatments.

You should use Teosyal® Touch Up on your patients who have already had Teosyal® treatments but want to make those treatments last longer. However, you can also use Teosyal® Global Action to treat mild to moderate lines and wrinkles.

On its own, Teosyal® Touch Up should last about 6 to 9 months, however in combination with other Teosyal® treatments it can make those cosmetic treatments last even longer.

## TEOSYAL® ULTRA DEEP

Teoxane Laboratories

### Active Composition

Reticulated hyaluronic acid (25mg/ml)

### Package Includes

1x1.2ml prefilled syringe, 2 sterile 25G1" needles

### Product Summary

Teosyal® Ultra Deep is a transparent, non-pyrogenic, visco-elastic gel of reticulated hyaluronic acid, of non-animal origin.

It is suitable for the treatment of cheeks, cheekbones and contours of the face, for the correction of minor ptoses and deep wrinkles. Teosyal® Ultra Deep creates a volume that corrects wrinkles and restores the original facial contours.

These results can last up to 12 months.

## TEOSYAL® RHA 1

Teoxane Laboratories

### Active Composition

Hyaluronic acid (15mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

Teosyal® RHA 1 is a temporary dermal filler made of non-animal stabilized hyaluronic acid. Its name stands for Resilient Hyaluronic Acid. The mix of cross-linked and non-modified hyaluronic acid in Teosyal® RHA 1 helps it act like natural hyaluronic acid, moving and stretching with the face.

Use it to correct the look of wrinkles and fine lines in skin, on the face and neck. This dermal filler is suited for mobile areas of the face, such as the cheeks, nasolabial folds, perioral area, forehead, and crow's feet, where the ability to stretch would be an advantage. You can also use it to fill circles under the eyes.

Results will likely last about 6 to 9 months.

## TEOSYAL® RHA 2

Teoxane Laboratories

### Active Composition

Cross-linked hyaluronic acid (23mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

It is a temporary dermal filler made with a mixture of cross-linked non-animal hyaluronic acid and non-modified hyaluronic acid, with lidocaine added. The hyaluronic acid in Teosyal® RHA 2 acts similarly to natural hyaluronic acid within the skin, helping it to move and stretch along with the skin.

Teosyal® RHA 2 is suitable for the face, in areas that tend to move such as the nasogenian folds which run from the nose to the chin, peribuccal cheek wrinkles, and glabellar forehead wrinkles. Doctors may choose to use it because the mixed hyaluronic acid formula helps the filler to stretch and move in active areas of the face.

Results last for about 6 to 9 months on average.

## TEOSYAL® RHA 3

Teoxane Laboratories

### Active Composition

Cross-linked hyaluronic acid (23mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

Teosyal® RHA 3 contains a combination of cross-linked hyaluronic acid and non-modified hyaluronic acid. While the cross-linked hyaluronic acid helps the filler to last longer before breaking down, the non-modified hyaluronic acid helps make the filler more elastic.

Use it to reduce the appearance of deep wrinkles in aging or prematurely-aged skin. This formula is most suitable for vertical lip lines, nasogenian folds, and other deep lines and creases. You can also use it to augment your patient's cheeks, restore the shape of their face, or fill depressions caused by scars.

Results should last around 6 to 9 months.

## TEOSYAL® RHA 4

Teoxane Laboratories

### Active Composition

Cross-linked hyaluronic acid (23mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

Teosyal® RHA 4 is a transparent, sterile, injectable gel made of cross-linked hyaluronic acid of non-animal origin. The gel contains lidocaine hydrochloride for its anesthetic properties.

Use it to restore volume lost through lipoatrophy from aging, premature aging, or illness, or to add volume for facial augmentation. You can use it to augment the cheeks or upper cheeks, correct minor ptosis, correct the lower eyelids, fill deep wrinkles in thick skin, correct the appearance of scars, or redefine the contours of the face. The hyaluronic acid also helps to hydrate the skin.

Results usually last about 6 to 9 months.

## TEOSYAL® PURESSENSE DEEP LINES

Teoxane Laboratories

### Active Composition

Reticulated hyaluronic acid (25mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

Teosyal® Puresense Deep Lines is an injectable gel made of pure, monophasic, homogeneous, non-animal hyaluronic acid with lidocaine for pain relief.

You can use it to correct deep nasal furrows or other deep lines or wrinkles. You can also use it to contour the cheeks and jaw line or to augment the lips.

It gives your patients immediate results from their cosmetic treatment, but it is also long-lasting, adding volume to the skin for up to 18 months.

## TEOSYAL® PURESENSE GLOBAL ACTION

Teoxane Laboratories

### Active Composition

Cross-linked hyaluronic acid (25mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

Teosyal® Puresense Global Action is an injectable gel that contains hyaluronic acid that is pure, homogeneous, and monophasic, as well as lidocaine for pain relief.

It is suitable for injection into the mid-dermis to correct superficial to moderate wrinkles such as glabellar lines, nasolabial folds, periorbital lines, and perioral wrinkles.

Results of a treatment can last about 18 months.

## TEOSYAL® PURESENSE KISS

Teoxane Laboratories

### Active Composition

Cross-linked hyaluronic acid (25mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

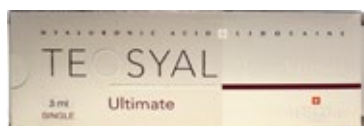

2x1ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

Teosyal® Puresense Kiss is an injectable gel containing pure, homogeneous, monophasic, non-animal hyaluronic acid as well as lidocaine for pain reduction.

It is suitable for injection into the lip mucosa or into the dermis for lip augmentation, lip contouring, lip rehydration, and perioral wrinkle correction.

Results can last up to about 18 months.

## TEOSYAL® PURESENSE ULTIMATE 3ML

Teoxane Laboratories

### Active Composition

Reticulated Hyaluronic Acid (66mg), lidocaine hydrochloride (9mg)

### Package Includes

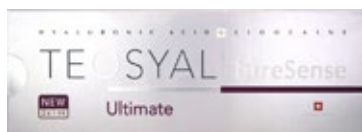

1x3ml prefilled syringe, 2 sterile 23G1" needles

### Product Summary

Teosyal® Puresense Ultimate 3ml is an injectable gel made of pure, homogeneous, monophasic, non-animal hyaluronic acid with lidocaine for pain reduction.

It is meant for patients who need large volumes of dermal filler. You can use it to correct or create volume in the cheeks, upper cheeks or chin. You can also use it to correct deep skin depressions.

It is 1 of the longest-lasting dermal fillers on the market, giving your patients up to 18 months of results from 1 treatment.

## TEOSYAL® PURESENSE ULTIMATE 2X1ML

Teoxane Laboratories

### Active Composition

Cross-linked hyaluronic acid (22mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

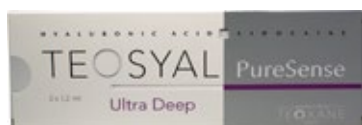

2x1ml prefilled syringes, 4 sterile 27G1/2" needles

### Product Summary

Teosyal® Puresense Ultimate 2x1ml is an injectable gel containing pure, homogeneous, monophasic, non-animal hyaluronic acid, with lidocaine added for pain reduction.

With its intense volumizing formula, it should be injected into the sub-dermal layer to provide large amounts of volume. You can use it to add or restore volume to facial features such as the upper cheeks, cheeks, and chin, or to correct deep skin depressions.

Results can last up to 18 months.

## TEOSYAL® PURESENSE ULTRA DEEP

Teoxane Laboratories

### Active Composition

Cross-linked hyaluronic acid (25mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

2x1.2ml prefilled syringes, 4 sterile 25G1/2" needles

### Product Summary

Teosyal® Puresense Ultra Deep is an injectable gel consisting of pure, homogeneous, monophasic, non-animal hyaluronic acid as well as lidocaine for pain relief.

It is suitable for use as a dermal filler, with injection into the deep dermis for the deepest wrinkle correction, volume augmentation, volume correction, facial contour resculpting and correction of minor ptoses.

These results can last up to 18 months.

## YVOIRE® CLASSIC S

LG Life Sciences

### Active Composition

22mg/ml cross-linked hyaluronic acid

### Package Includes

1x1ml prefilled syringe, 2 thin-wall needles

### Product Summary

Yvoire® Classic S contains cross-linked hyaluronic acid 22mg/ml and tiny particles which are tightly packed, without any gaps, next to a high concentration of hyaluronic acid.

It is used to treat facial wrinkles, improve skin texture and glow, and create lip augmentation. It provides a smooth and natural look.

Results are instant from the first treatment. In general the results will last from 6 to 9 months and even up to 1 year.

## YVOIRE® CONTOUR

LG Life Sciences

### Active Composition

22mg/ml cross-linked hyaluronic acid

### Package Includes

1x2ml prefilled syringe, 2 thin-wall needles

### Product Summary

Yvoire® Contour is an injectable gel for correcting deep wrinkles or facial lipoatrophy, or for facial contouring. Cross-linked hyaluronic acid helps hold moisture within the skin to restore volume. Containing large and fine particles which are tightly packed, without any gaps, next to a high concentration of hyaluronic acid. Yvoire Contour creates natural looking results.

It treats extreme facial wrinkles, nasolabial folds, defects in the facial volume, facial lipoatrophy and improves facial contouring.

Results are instant from the first treatment. In general the results will last from 6 to 9 months and even up to 1 year.

## BELOTERO® HYDRO

Merz Aesthetics

### Active Composition

18mg/ml sodium hyaluronate of non-animal origin

### Package Includes

1 prefilled single-use syringe of 1ml gel, 2 sterile 30G1/2 needles

### Product Summary

Belotero® Hydro is a sterile, transparent gel made of non-crosslinked hyaluronic acid and glycerol.

Belotero® Hydro is most suitable for your patients who have skin that is free of deep wrinkles but beginning to experience the earliest signs of aging and sun damage, including dryness. It is suitable for use in areas such as the face, neck, décolletage and hands, which have become dry over time.

The initial treatment phase of Belotero® Hydro includes 2 or 3 injection sessions held thirty days apart. This allows time for the hyaluronic acid and glycerol to rehydrate the skin. After this, your patients should return for maintenance injections once or twice a year.

## CYTOCARE 502

Laboratoires Revitacare

### Active Composition

Hyaluronic acid

### Package Includes

10 vials x 5ml

### Product Summary

Cytocare 502 is an injectable solution containing hyaluronic acid and a rejuvenating complex with vitamins, minerals, amino acids and other skin nutrients.

The hyaluronic acid in Cytocare 502 helps to rehydrate the skin. The ingredients provide the building blocks that new skin cells need to grow as well as stimulate the growth of new skin cells, keeping a steady supply of youthful skin cells to help maintain a youthful complexion.

To start, schedule your patients to have 3 treatment sessions 3 weeks apart. After this initial skin rejuvenation, you should have your patients return for 1 treatment session every 3 months.

## FILORGA® NCTF 135®

Laboratoires Filorga

### Active Composition

Sodium Hyaluronate, polyrevitalizing solution

### Package Includes

5x3ml bottles, 5x3ml syringes, 55x18G withdrawal needles, 5x30G therapy needles, 5x32G therapy needles

### Product Summary

Filorga® NCTF 135® is a solution of hyaluronic acid, intended for revitalizing mesotherapy, biological rejuvenation and hydration of old, tired skin, as well as flattening of superficial wrinkles.

It is indicated for areas such as face, neck, décolletage, inside of wrist, inner thighs and periorbital zones.

It will take a minimum of 5 treatment sessions for your patient to notice an improvement in their skin. You should give your patient 3 treatment sessions spaced out by 15 days and 2 treatments spaced out by 1 month. Your patient should return every 3 months for another treatment to maintain their results.

## FILORGA® NCTF 135 HA® 5 VIALS

Laboratoires Filorga

### Active Composition

Sodium Hyaluronate (5mg/ml), polyrevitalizing solution

### Package Includes

5x3ml bottles, 5x3ml syringes, 5x18G withdrawal needles, 5x30G therapy needles, 5x32G therapy needles

### Product Summary

Filorga® NCTF 135 HA® is a solution of hyaluronic acid.

It is intended for rejuvenating mesotherapy, biological reinvigoration, intensive rehydration of old skin, general rehydration and moisturizing, flattening of superficial wrinkles and recovery of lost elasticity.

You can adjust your patient's treatment schedule to their individual needs. In phase 1, you will give your patient 4 sets of injections, a week to 15 days apart. In phase 2, you will give your patients 2 treatments, a month apart. In phase 3, you will give your patient a maintenance treatment every 2 to 6 months to maintain their hydrated skin.

## FILORGA® NCTF 135 HA® 10 VIALS

Laboratoires Filorga

### Active Composition

Sodium Hyaluronate (5mg/ml), polyrevitalizing solution

### Package Includes

10x3ml bottles

### Product Summary

Filorga® NCTF 135 HA® is a solution of hyaluronic acid.

It is intended for rejuvenating mesotherapy, biological reinvigoration, intensive rehydration of old skin, general rehydration and moisturizing, flattening of superficial wrinkles and recovery of lost elasticity.

You can adjust your patient's treatment schedule to their individual needs. In phase 1, you will give your patient 4 sets of injections, a week to 15 days apart. In phase 2, you will give your patients 2 treatments, a month apart. In phase 3, you will give your patient a maintenance treatment every 2 to 6 months to maintain their hydrated skin.

## FILORGA® NCTF 135 HA® MESO KIT NEEDLING 1MM

Laboratoires Filorga

### Active Composition

Sodium Hyaluronate (5mg/ml), polyrevitalizing solution

### Package Includes

10x3ml vials, 1 roller, 10 discs

### Product Summary

Filorga NCTF 135 HA Meso Kit is a mesotherapy treatment for rehydrating and revitalizing aging skin.

The hyaluronic acid holds moisture to help restore hydration and volume, while the polyrevitalizing cocktail of vitamins, amino acids, minerals, coenzymes, nucleic acids, and antioxidants help support skin cell function and collagen growth for improved skin texture.

The included dermaroller helps deliver the solution and stimulate skin growth. This mesotherapy kit is suitable for use on aging and dehydrated skin on the face, neck, décollete, hands, cleavage, abdomen, inner thigh, and arms.

## JUVÉDERM® HYDRATE

Allergan, Inc.

### Active Composition

Hyaluronic acid gel (13.5mg/ml), mannitol (9mg/ml)

### Package Includes

1x1ml prefilled syringe, 2 sterile 30G1/6" needles

### Product Summary

Juvéderm® Hydrate is a sterile apyrogenic, physiological solution of hyaluronic acid gel, which is not of animal origin. It is a great way for your patients to improve the texture of their neck, décolletage, hands or face, when the volume of regular fillers is not needed.

It instantly plumps up to about a thousand times its size with moisture, rehydrating the skin and smoothing out wrinkles and other texture issues for smoother, more refreshed-looking skin.

Skin hydration and rejuvenation effects last up to 3 months. It is recommended not to repeat treatments more frequently than every 15 days.

## PLURIAL® BOOSTER

MD Skin Solutions

### Active Composition

Sodium hyaluronate (18mg/ml), glycerol (20mg/ml)

### Package Includes

2x1ml prefilled syringes, 4x30G1/2" needles

### Product Summary

Pluryal® Booster is an injectable skinbooster made of cross-linked sodium hyaluronate at a concentration of 18mg/ml and glycerol at a concentration of 20mg/ml.

Use it as a skinbooster, or mesotherapy treatment, to fill fine lines and restore skin affected by the first signs of aging, smoking or sun damage. You can use it to treat fine lines, crow's feet, smile lines or smoker's lines around the mouth. It can help rehydrate the skin and restore skin tone and elasticity.

Initially, use it in 3 treatment sessions 3 weeks apart. Patients may need to return for maintenance treatments every 3 to 6 months.

## PLURIAL® MESO I

MD Skin Solutions

### Active Composition

Hyaluronic acid sodium salt, L-isoleucine, L-leucine, L-lysine hydrochloride, L-proline, L-valine, Glycine, L-serine, L-alanine, L-cysteine, sodium bicarbonate, water

### Package Includes

3x5ml vials

### Product Summary

Pluryal® Meso I is a transparent, sterile, injectable solution made of hyaluronic acid and amino acids.

This mesotherapy treatment can be used for glabella lines, cheeks, nasolabial folds, bottom corners of the mouth and lower chin to help hydrate and smooth the skin. You can also use this skin booster on the neck, décolletage, and the backs of the hands. Although it is not suitable for treating deep wrinkles, it can help correct minor damage, usually helping patients between the ages of about 20 to 40.

Start with 4 sessions, 1 session every 7 days. Follow with 2 more sessions, 15 days apart. Perform a follow-up treatment about once a month to every 6 months.

## PLURYAL® MESO II

MD Skin Solutions

### Active Composition

Hyaluronic acid sodium salt, Choline bitartrate, Glycine, L-serine, L-alanine, L-proline, L-lysine hydrochloride, L-cysteine, sodium chloride, phosphate buffer system, water

### Package Includes

3x5ml vials

### Product Summary

Pluryal® Meso II is an injectable skin booster solution made of hyaluronic acid fragments, choline, and an amino acid complex.

Use it as a skin booster, or mesotherapy treatment. It is suitable for treating the face, neck, décolletage and the backs of the hands. This skin booster is most suitable for women aged 40 and older.

Depending on the condition of your patient's skin, initially you should administer 4 treatments a week apart, then 2 sessions a month apart. To maintain your patient's results, you should administer another set of injections every 2 to 6 months.

## PRINCESS® RICH

CROMA GmbH

### Active Composition

Sodium hyaluronate (18mg/ml), glycerol (20mg/ml)

### Package Includes

1x1ml syringe, 1x1ml syringe, 2x30G1/2" needles

### Product Summary

Princess® Rich is a sterile, biodegradable, viscoelastic, clear, isotonic and homogenized injectable implant. It consists of non-animal sodium hyaluronate obtained from Streptococcus equi bacteria.

It improves the look of skin on your patient's face, neck, décolletage, upper arms and backs of the hands. It replenishes the skin's natural supply of hyaluronic acid to improve moisture retention in the skin for softer, smoother, more hydrated, and more youthful-looking skin.

For maximum effect, you should give your patients a set of injections every 2 or 3 weeks for a total of at least 3 treatments. After this time, results last for about 3 months.

## RESTYLANE® SKINBOOSTERS VITAL

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml)

### Package Includes

1x1ml prefilled syringe, 3 sterile 30G1/2" needles

### Product Summary

Restylane® Skinboosters Vital is a sterile, transparent gel of stabilized hyaluronic acid of non-animal origin.

Unlike a dermal filler, skinboosters do not add much volume to your patient's skin. Instead, the skin boosters hydrate from within, leaving your patient's skin more elastic and smoother. Use it for the hands, face, neck and décolletage. Rough, loose skin can be restored to become skin that is smoother and more refreshed.

Your patients should start by purchasing 3 cosmetic treatments spaced apart by about 4 weeks. After that initial round, your patients should return every 4 to 6 months for follow-up.

## RESTYLANE® SKINBOOSTERS VITAL WITH LIDOCAINE

Q-Med AB

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (20mg/ml), lidocaine hydrochloride (3mg/ml)

### Package Includes

1x1ml prefilled syringe, 3 sterile 30G1/2" needles

### Product Summary

Restylane® Skinboosters Vital with Lidocaine is a sterile, transparent gel of stabilized hyaluronic acid of non-animal origin with the addition of 0.3% lidocaine hydrochloride.

The hyaluronic acid helps to hydrate the skin from the inside out. The hyaluronic acid binds to water, hydrating your patient's skin and smoothing out fine lines for a more even texture.

Your patients should return every 3 or 4 weeks for another treatment, for a total of 3 skinbooster treatments. Most patients will continue to enjoy the results for about 6 months.

## RESTYLANE® SKINBOOSTERS VITAL LIGHT

### Active Composition

Non-animal stabilized hyaluronic acid, NASHA™ (12mg/ml)

### Package Includes

1x1ml prefilled syringe, 30G1/2" needle

### Product Summary

Restylane® Skinboosters Vital Light is a skin-rejuvenating injection made of non-animal stabilized hyaluronic acid (NASHA) gel.

It is suitable for younger or delicate skin, such as the neck, décolletage and back of the hands. It improves lustre, elasticity, hydration and skin quality.

Initially, you should perform 2 to 3 treatments spaced 4 weeks apart, with treatments every 4 to 6 months to maintain the results.

## RESTYLANE® SKINBOOSTERS VITAL LIGHT WITH LIDOCAINE

Q-Med AB

### Active Composition

Hyaluronic acid, stabilized (12mg/ml) and Lidocaine hydrochloride (3mg/ml)

### Package Includes

1x1ml prefilled syringe, 3 needles

### Product Summary

Restylane® Skinboosters Vital Light with Lidocaine is a skin-rejuvenating injection made of non-animal stabilized hyaluronic acid (NASHA) gel, with lidocaine added for its anesthetic properties.

The gel helps replenish hyaluronic acid, restoring moisture and improving elasticity and skin tone. You can use it on the face, neck, décolletage and hands.

Initially, you should perform 2 to 3 treatments spaced 4 weeks apart, with treatments every 4 to 6 months to maintain the results.

## STYLAGE® HYDRO

Laboratoires VIVACY

### Active Composition

Sodium hyaluronate (14mg/g), mannitol

### Package Includes

1x1ml prefilled syringe, 2x30G1/8" needles

### Product Summary

Stylage® Hydro is a reinforced hyaluronic acid gel, non-animal in origin, which incorporates an antioxidant (mannitol). It is sterile and apyrogenic, with physiological pH and osmolarity.

The hyaluronic acid helps restore hydration to your patient's face, neck, décolletage or hands. It plumps up the skin to smooth out fine lines or a rough texture while encouraging collagen growth and improving elasticity. The hyaluronic acid also hydrates the skin, giving it a healthy, youthful glow.

Usually, you would inject your patients in 3 sessions within 3 weeks to a month, then give them maintenance treatments every 3 to 6 months.

## STYLAGE® HYDROMAX

Laboratoires VIVACY

### Active Composition

Sodium hyaluronate (12.5mg/g), sorbitol

### Package Includes

1x1ml prefilled syringe, 1x30G1/8" and 1x30G1/2" needles

### Product Summary

Stylage® Hydromax is made from 12.5mg/g of hyaluronic acid, as well as an added ingredient, mannitol, which acts as an antioxidant. It also includes a special ingredient, sorbitol, that acts as an antioxidant and a moisturizer. The injections can provide deep, instant hydration to dry and dehydrated skin, improve skin elasticity, act as a dermal restructuring treatment, and revitalize your patient's face, neck, décolletage and hands.

Normally you would inject Stylage® Hydromax every couple of weeks for 2 or 3 courses of treatment, then give injections every 2 or 3 months to maintain results.

## TEOSYAL® MESO

Teoxane Laboratories

### Active Composition

Reticulated hyaluronic acid (15mg/ml)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

Like a dermal filler, Teosyal® Meso is made from non-animal stabilized hyaluronic acid (NASHA™) that is cross-linked for stability but it is less dense. Instead of adding volume to the skin, it simply rehydrates and revitalizes skin near the surface.

It is ideal for patients who have the first signs of aging. It can also help mature patients who have treated their face with dermal fillers but have neglected their hands, neck and décolletage. If your patients have small skin imperfections or want to treat thin, sensitive areas, it is a great choice.

Generally, patients have treatments 2 or 3 times over a period of 2 to 4 weeks to start.

## TEOSYAL® PURESENSE REDENSITY I

Teoxane Laboratories

### Active Composition

Hyaluronic acid (15mg/ml), lidocaine hydrochloride (0.3%)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

Teosyal® Puresense Redensity I contains hyaluronic acid, known for its hydrating and volume-restoring properties; Lidocaine, known for its anesthetic properties; and a rejuvenating complex of amino acids, antioxidants, vitamins, and minerals to nourish skin.

Use this mesotherapy dermal filler to hydrate and rejuvenate skin, improving its density for a more youthful appearance. Administer 3 weekly treatments to improve the look of aging skin.

## TEOSYAL® PURESENSE REDENSITY II

Teoxane Laboratories

### Active Composition

Hyaluronic acid (15mg), lidocaine hydrochloride (3mg)

### Package Includes

2x1ml prefilled syringes, 4 sterile 30G1/2" needles

### Product Summary

It is an injectable gel made of hyaluronic acid with other ingredients like amino acids, antioxidants, vitamins, minerals as well as lidocaine.

Teosyal® Puresense Redensity II is specially designed to treat the peri-orbital area, the eye circles, including tear troughs. The formula is light, so you do not need to apply as much pressure to inject it into the skin tissue, making it ideal for the delicate eye area.

Results last for about a year.

## FILORGA® BRIGHT PEEL (NORMAL SKIN)

Laboratoires Filorga®

### Active Composition

Peel Complex 50%: gluconolactone, phytic acid, citric acid, glycolic acid

### Package Includes

1x100ml bottle, 1 cylinder flask, 1 brush

### Product Summary

Filorga® Bright Peel (Normal Skin) is a medical-grade chemical peel that contains gluconolactone, glycolic acid, phytic acid, and citric acid.

This medical-grade chemical peel uses ingredients to specifically target dark spots and hyperpigmentation. Phytic acid and citric acid target the dark pigmentation while gluconolactone and glycolic acid fight the signs of aging, like wrinkles and dull skin.

You should give your patients a total of 4 treatments 2 weeks apart. This is the clinically tested protocol that can help your patients get the best results.

## FILORGA® LIGHT PEEL (SENSITIVE SKIN)

Laboratoires Filorga®

### Active Composition

Peel Complex 20%: gluconolactone, mandelic acid, tromethamine, pentylene glycol, water

### Package Includes

1x100ml bottle, 1 cylinder flask, 1 brush

### Product Summary

Filorga® Light Peel (Sensitive Skin) is a medical-grade chemical peel containing gluconolactone and mandelic acid. It contains mandelic acid and was designed to be an effective skin peel while still gentle for your patients with sensitive skin. You will usually use it as an anti-aging treatment, reducing the appearance of fine lines. It can help improve a dull complexion. However, it is not suitable for patients with darker skin because it could cause uneven-looking patches of skin.

You should use it 4 times, 2 weeks apart, for your patients to get the maximum effect from their peel treatment.

## FILORGA® TIME PEEL (NORMAL SKIN)

Laboratoires Filorga®

### Active Composition

Peel Complex 50%: gluconolactone, glycolic acid, sodium lactate, water

### Package Includes

1x100ml bottle, 1 cylinder flask, 1 brush

### Product Summary

Filorga® Time Peel (Normal Skin) is a medical-grade chemical peel containing gluconolactone and glycolic acid. It is a medical-grade skin peel that gradually lifts layers of dull, dead skin cells, while encouraging the growth of new skin cells. You can apply it during your patient's lunch break, giving them an anti-aging solution with little downtime. As their skin gradually peels, it will reveal firmer, more radiant skin with less visible wrinkling.

You should perform a Filorga® Time Peel (Normal Skin) treatment session every 2 weeks for a total of 4 sessions.

## FILORGA® POST PEEL

Laboratoires Filorga®

### Active Composition

Sodium bicarbonate, sodium dextran sulfate, phenoxyethanol, sodium methylparaben, water

### Package Includes

100ml spray bottle

### Product Summary

Filorga® Post Peel is a solution of sodium bicarbonate and other ingredients, with a pH of about 8.

Use it in conjunction with a chemical peel such as Filorga® Light Peel, Filorga® Time Peel, or Filorga® Bright Peel. The post-peel neutralizing solution helps stop the action of the peel acids and helps to soothe your patient's irritated skin.

Patients should use it immediately after a chemical peel.

## FILORGA® PRE PEEL

Laboratoires Filorga®

### Active Composition

Gluconolactone, phenoxyethanol, sodium methylparaben, water

### Package Includes

100ml spray bottle

### Product Summary

Filorga® Pre Peel is a pH 4 solution containing gluconolactone, phenoxyethanol, and sodium methylparaben that helps prepare skin for a chemical peel.

Use Filorga® Pre Peel before a Filorga® chemical peel. The pre-peel preparation helps to cleanse the skin and adjust its pH, freeing the skin of impurities and preparing the skin to help the effectiveness of the chemical peel. It is suitable for all skin types.

Use Filorga® Pre Peel just before performing a chemical peel on your patient.

## PRINCESS® SKINCARE GREEN TEA MASK

Croma-Pharma GmbH

### Active Composition

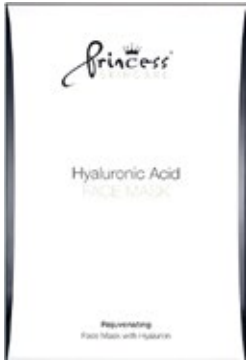

Camellia sinensis leaf extract, aloe barbadensis leaf juice

### Package Includes

8 individually-packaged masks

### Product Summary

The Princess® Skincare Green Tea Mask uses ingredients such as green tea and aloe to help calm and soothe skin while helping promote skin repair and offering antioxidant protection. This facial mask is suitable for at-home use. This mask is for stressed skin from environmental exposure or aesthetic treatments. Ingredients such as aloe vera leaf juice, green tea extract, algae extract and other natural ingredients nourish the skin as it heals and repairs. Your patients can use it whenever they wish to give their skin a refreshing treatment, including after an aesthetic treatment.

## PRINCESS® SKINCARE HYALURONIC ACID MASK

Croma-Pharma GmbH

### Active Composition

Sodium hyaluronate, glycerin

### Package Includes

8 individually-packaged masks

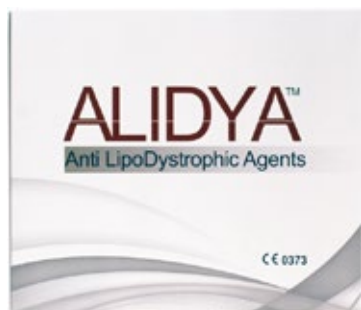

### Product Summary

Princess® Skincare Hyaluronic Acid Mask is an at-home facial mask containing hyaluronic acid and other ingredients, such as glycerin and algae extract.

Hyaluronic acid restores moisture and plumps the skin slightly to reduce the look of fine lines and wrinkles. Hyaluronic acid can also help stimulate the growth of collagen and elastin. The facial mask also contains glycerin, known for its skin-hydrating properties. The mask has a cooling, soothing feel that can also help soothe tired, irritated skin.

Your patients can use this mask whenever they wish to treat their skin to its soothing and hydrating feel.

**ALIDYA™**

Ghimas

**Active Composition**

Poli aminoacidic gel, a-D-(+) glucopyranose, 1-4 glycosidic, etilendiaminotetraacetic sodium, amino acid buffer system with bicarbonate-sodium corrector, osmolality regulator

**Package Includes**

5 vials x 340mg powder, 5 vials x 10ml solvent

**Product Summary**

Alidya™ is an anti-lipodystrophic agent called 2nd Motolese's solution, made of amino acids and other ingredients. Use it to help reduce the look of cellulite. Some doctors use this after liposuction to correct the appearance of the skin, after other fat removal methods such as intralipotherapy, to correct leg swelling called lipoedema, with or without fluid retention called limfoedema, and to correct adipose tissue changes.

Administer Alidya™ in a minimum of 7 and a maximum of 12 weekly treatment sessions. To maintain the treatment results, repeat the injections once a year.

**AQUALYX®**

Marllor Biomedical

**Active Composition**

Motolese's solution

**Package Includes**

10 vials of 8ml each

**Product Summary**

Aqualyx® is an aqueous solution with a microgelatinous base for enhancing the action of external ultrasound waves for the microcavitation of adipose tissue.

It is meant to be injected into adipose tissue to reduce stubborn pockets of fat that persist despite weight loss. Targeted areas include the thighs, hips, knee area, area beneath the buttocks, back, stomach, chin, and area beneath the chin. It is also used to treat pseudo-gynaecomastia. Aqualyx® is meant to reduce the appearance of small areas of stubborn fat, not for general weight loss in obese patients.

Best results will come after 2 to 8 sets of injections, 4 weeks apart, but this varies.

**LIPOINJECT®**

Marllor Biomedical

**Active Composition**

Steel

**Package Includes**

20x25G 70mm needles (small area) or 20x24G 100mm (medium/large area). Contains needles only

**Product Summary**

Lipoinject® are specialized needles available in 2 sizes. These intralipotherapy needles are suitable for injecting fat-dissolving solution, such as Motolese's solution, also known as Aqualyx®, and other deoxycholic acid solutions. Use Lipoinject® intralipotherapy needles specifically for fat-dissolving injections, such as with Aqualyx®. These treatments target localized fat deposits, such as a double chin, stomach fat, fatty thighs, or buffalo hump associated with HIV.

Intralipotherapy treatment sessions should be at least 15 days apart, usually 3 or 4 weeks apart, and they usually require 2 to 8 treatment sessions.

## BELKYRA

Allergan

### Active Composition

20mg/2ml of deoxycholic acid

### Package Includes

4x2ml preloaded glass vials, package insert

### Product Summary

Belkyla is a synthetic bile acid that is renowned for its effective submental fat dissolving activity. Belkyla is designed especially to eliminate moderate-to-severe fat below the chin (submental fat), also known as 'double chin'. Protein-rich tissues like muscle and skin remain unaffected by Belkyla. Administer this bile acid formulation subcutaneously into the excessive fat tissues below the chin. For best results, perform up to 6 treatments spaced 1 month apart. The effects are permanent as long as patients refrain from gaining weight.

## HYACORP BODY CONTOURING MLF1

Bio-SCIENCE

### Active Composition

20mg/ml cross-linked hyaluronic acid, 2mg/ml hyaluronic acid sodium salt

### Package Includes

1x10ml prefilled syringe

### Product Summary

Hyacorp Body Contouring MLF1 is an injectable body implant that helps to sculpt body contours easily. Hyacorp Body Contouring MLF1 is indicated to non-surgically sculpt various parts of the body such as the buttocks, chests, and calves according to patients' preferences. Inject this hyaluronic acid-based body implant via subcutaneous or supraperiosteal injections depending on the treatment sites. Treated body parts should maintain its sculpted shape for about 12 to 24 hours.

## HYACORP BODY CONTOURING MLF2

Bio-SCIENCE

### Active Composition

20mg/ml cross-linked hyaluronic acid, 2mg/ml hyaluronic acid sodium salt

### Package Includes

1x10ml prefilled syringe

### Product Summary

Hyacorp Body Contouring MLF2 is a hyaluronic acid-based implant ideal for sculpting the body shape seamlessly. Hyacorp Body Contouring MLF2 is designed for patients wanting non-surgical procedure to sculpt their various body parts such as the calves, chests, and buttocks. The body implant can also be used to correct concave deformity of the chest. Administer this body implant into the subcutaneous or supraperiosteal layer of the skin depending on the proposed areas of treatment. The desirable effects could last for approximately 2 years or more.

## CRESPINE® GEL PLUS

BioPolymer

### Active Composition

Sodium hyaluronate, prilocaine

### Package Includes

1x2ml prefilled syringe

### Product Summary

It is a viscosupplement injection with crosslinked and non-crossed linked sodium hyaluronate from a non-animal origin. The gel also contains prilocaine.

Use it to help alleviate symptoms of osteoarthritis, such as pain and poor joint function. It is suitable for the knee, hip or other joints affected by osteoarthritis. Doctors may use Crespine® Gel Plus to replace other treatments such as oral drugs, to supplement drugs or other treatments, or to delay knee or hip replacement surgery.

Results from a single injection usually last about 6 to 8 months. Your patients will likely start to feel pain relief about 5 to 7 days after the treatment.

## DUROLANE®

Q-Med

### Active Composition

Non-animal stabilized hyaluronic acid (20mg/ml)

### Package Includes

1x3ml prefilled syringe

### Product Summary

Durolane® contains 20mg/ml of stabilized non-animal hyaluronic acid in buffered physiological sodium chloride solution pH 7. It is a sterile, transparent viscoelastic gel supplied in a 3ml glass syringe.

It can help osteoarthritis patients with pain in their knee, hip or other joints.

After an injection, some patients may experience immediate relief from their osteoarthritis symptoms, but for others it may take longer. Durolane® is meant for a single injection instead of a series of 3 to 5 injections like many other viscosupplements, and this 1 injection can last for up to about 6 months.

## EUFLEXXA®

Bio-Technology General (Israel) Ltd.

### Active Composition

Sodium hyaluronate (10mg/ml), sodium chloride (8.5mg/ml), disodium hydrogen phosphate dodecahydrate (0.56mg/ml), sodium dihydrogen phosphate dihydrate (0.05mg/ml)

### Package Includes

3x2ml prefilled syringes

### Product Summary

It is an injectable hyaluronic-acid based viscosupplement intended for relief of osteoarthritis knee pain. Euflexxa® replaces synovial fluid thereby restoring lubrication and cushioning of the knee joints for up to 6 months.

Manufactured from non-avian precursors, Euflexxa® is known to relieve osteoarthritis symptoms from the first injection, although all 3 injections are required for a complete therapeutic course.

Each Euflexxa® syringe is intended for single use only. Usually a dose of 2ml is injected into the affected knee at weekly intervals for 3 weeks, for a total of 3 injections.

## HYALGAN®

Fidia Farmaceutici S.p.A.

### Active Composition

Sodium hyaluronate (10mg/ml)

### Package Includes

1x2.2ml prefilled syringe

### Product Summary

It is a solution that contains a natural substance called hyaluronate.

It is for osteoarthritis patients looking to replace their drug therapy or supplement their current therapy with another. Typically Hyalgan® 20mg/2ml is used to treat a patient's arthritic knee. However, it can also be used in other joints that are affected by osteoarthritis.

Most of your patients should notice a difference about a week after you give them their third injection, but some patients may need to wait until after they have had 5 injections to get pain relief. Hyalgan® 20mg/2ml is a 5-injection regimen given at weekly intervals that provides long-lasting pain relief for up to 6 months.

## MONOVISC™

Anika Therapeutics Inc.

### Active Composition

Cross-linked sodium hyaluronate (22mg/ml)

### Package Includes

1x4ml prefilled syringe

### Product Summary

Monovisc™ is a single, intra-articular injection of cross-linked sodium hyaluronate. It is manufactured from ultra pure, high molecular weight sodium hyaluronate produced by bacterial fermentation.

It is indicated as a viscoelastic supplement or a replacement for synovial fluid in human joints. It is well suited for treatment of the symptoms of human joint dysfunctions such as osteoarthritis. It provides lubrication and mechanical support.

It is designed to work with 1 injection instead of multiple weekly injections. Patients should experience relief from their osteoarthritis symptoms for up to 6 months.

## MONOVISC™ NON-ENGLISH

Anika Therapeutics Inc.

### Active Composition

Cross-linked sodium hyaluronate (22mg/ml)

### Package Includes

1x4ml prefilled syringe

### Product Summary

Monovisc™ is a single, intra-articular injection of cross-linked sodium hyaluronate. It is manufactured from ultra pure, high molecular weight sodium hyaluronate produced by bacterial fermentation.

It is indicated as a viscoelastic supplement or a replacement for synovial fluid in human joints. It is well suited for treatment of the symptoms of human joint dysfunctions such as osteoarthritis. It provides lubrication and mechanical support.

It is designed to work with 1 injection instead of multiple weekly injections. Patients should experience relief from their osteoarthritis symptoms for up to 6 months.

## ORTHOVISC®

Anika Therapeutics Inc.

### Active Composition

Sodium hyaluronate (15mg/ml)

### Package Includes

1x2ml prefilled syringe

### Product Summary

It is an injectable, clear, viscoelastic solution for relieving osteoarthritis pain on its own or as a supplement to other therapies. It contains a non-avian sourced, ultra-pure, high molecular weight hyaluronic acid formula intended to replace lost synovial fluid and relieve osteoarthritis symptoms for up to 6 months.

Can be used on knee joints as well as other synovial joints affected by osteoarthritis.

The recommended treatment regimen is 3 injections spaced 1 week apart for each treatment course. Not to exceed 1 treatment for any individual joint in any 6-month period. Any joint effusion present should be removed before injecting Orthovisc®.

## SUPARTZ®

Seikagaku Corporation

### Active Composition

Highly purified hyaluronan (10mg/ml)

### Package Includes

5x2.5ml prefilled syringes

### Product Summary

It is an avian-sourced sodium-hyaluronate viscosupplement that acts as a replacement for synovial fluid lost from joints with age or as a result of obesity. Intended for relief of osteoarthritis symptoms as a stand-alone treatment or as a supplement to existing therapies.

A total of 3 to 5 Supartz® injections, made at weekly intervals, yield relief from osteoarthritis symptoms for up to 6 months.

Orthopedic surgeons most often use Supartz® to treat the knees, but it can also be effective for other joints affected by osteoarthritis. Some patients may experience benefit with as few as 3 injections given at weekly intervals.

## SYNVISC®

Genzyme Europe B.V.

### Active Composition

Hylan (8mg/ml)

### Package Includes

3x2ml prefilled syringes

### Product Summary

An avian-sourced hyaluronan solution with a chemically crosslinked formula of high molecular weight for improved stability.

SYNVISC® replaces lost hyaluronic acid and cushions affected joints, effectively halting pathological progression and providing immediate relief of osteoarthritis symptoms as a stand-alone treatment or as a supplement to existing therapies.

For maximum effect, the recommended treatment regimen is 3-2ml injections in the knee, with an interval of 1 week between each injection. The maximum recommended dosage is 6 injections within 6 months, with a minimum of 4 weeks between treatment regimens.

## SYNVISC® ONE

Genzyme Europe B.V.

### Active Composition

Hylan (8mg/ml)

### Package Includes

1x6ml prefilled syringes

### Product Summary

It is an avian-sourced hyaluronic acid solution.

Synvisc® One acts as a replacement for synovial fluid lost from joints with age or as a result of obesity. It is intended for relief of osteoarthritis symptoms as a stand-alone treatment or as a supplement to existing therapies.

It is only intended for intra-articular use by a physician to treat pain associated with osteoarthritis of the knee.

The recommended treatment regimen is 1-6ml injection in the knee. The injection may be repeated 6 months after the first injection, if justified by the patient's symptoms.

## SILHOUETTE SOFT® 8 CONES

Sinclair pharma

### Active Composition

Surgical strands of poly-L-lactic acid with molded cones made of lactide/glycolide

### Package Includes

5 packs x 2 sutures

### Product Summary

Silhouette Soft® instalift device is a special suture for a non-surgical facelift. The suture is made of polylactic acid which gradually dissolves, leaving behind natural collagen growth, with bi-directional cones made of lactide glycolide. These cones help to keep the threads in place. Silhouette Soft® has 8 cones spaced 0.5cm apart on a 30cm long suture.

In skin that does not have severe sagging, the sutures lift and tighten skin. It is most suitable for patients in their mid-30s to mid-50s for locations such as the mid-face, cheeks or cheekbones, facial contours, jaw line, eyebrows or neck.

Results last up to 24 months.

## SILHOUETTE SOFT® 12 CONES

Sinclair pharma

### Active Composition

Surgical strands of poly-L-lactic acid with molded cones made of lactide/glycolide

### Package Includes

5 packs x 2 sutures

### Product Summary

Silhouette Soft® instalift device is a special suture for a non-surgical facelift. The suture is made of polylactic acid which gradually dissolves, leaving behind natural collagen growth, with bi-directional cones made of lactide glycolide. These cones help to keep the threads in place. Silhouette Soft® has 12 cones spaced 0.8cm apart on a 27.5cm long suture

In skin that does not have severe sagging, the sutures lift and tighten skin. It is most suitable for patients in their mid-30s to mid-50s for locations such as the mid-face, cheeks or cheekbones, facial contours, jaw line, eyebrows or neck.

Results last up to 24 months.

## SILHOUETTE SOFT® 16 CONES

Sinclair pharma

### Active Composition

Surgical strands of poly-L-lactic acid with molded cones made of lactide/glycolide

### Package Includes

5 packs x 2 sutures

### Product Summary

Silhouette Soft® are surgical sutures made of polylactic with attached molded cones made of lactide glycolide. These cones help to keep the threads in place. Silhouette Soft® has 16 cones spaced 0.8cm apart on a 26.8cm long suture.

In skin that does not have severe sagging, the sutures lift and tighten skin. It is most suitable for patients in their mid-30s to mid-50s for locations such as the mid-face, cheeks or cheekbones, facial contours, jaw line, eyebrows or neck.

Results last up to 24 months.

## COOLSENSE™ PAIN NUMBING APPLICATOR

CoolSense Medical Ltd.

Active Composition	Package Includes
n/a	1 device
Product Summary	
CoolSense™ Pain Numbing Applicator is a medical device that cools the skin to reduce pain. It is suitable for use before cosmetic injections or other medical injections.	
Pain-relieving creams can take a while to numb the skin, forcing your patients to wait longer for their cosmetic injection. This is applied to the skin for just 4 or 5 seconds to numb the area before an injection.	
It must remain in a freezer at least an hour, and reach a temperature of 0 to minus 4°C, before it will be effective for pain relief.	

## EMLA™

Astra Zeneca

Active Composition	Package Includes
Lidocaine (2.5%), prilocaine (2.5%)	5x30g
Product Summary	
Emla™ cream contains 2 active ingredients, lidocaine and prilocaine, which help to numb the sensation of pain during injection procedures.	
It is important to apply a thick layer of cream and cover it with an air-tight dressing. Allow the cream to absorb into the skin for at least 1 hour. Remove the wrap and clear the area of excess cream thoroughly before the cosmetic procedure.	
This cream should be applied to the skin about 1 to 2 hours before the cosmetic procedure. Do not rub it in. There is no added benefit if Emla™ cream is left on for longer than 5 hours.	

## PLIAGLIS®

Galderma

Active Composition	Package Includes
Lidocaine (7%), tetracaine (7%)	5x15g
Product Summary	
Pliaglis® cream is a topical anaesthetic, which contains 2 active ingredients, lidocaine and tetracaine. Use before dermatological procedures, such as non-ablative laser facial resurfacing and dermal filler injections	
It should be applied in a clinical setting. Use an instrument like a tongue depressor to spread the cream in a thin, even layer. Let it dry for no longer than 30 minutes before the procedure. Peel the dry cream away and discard carefully.	
Due to the risk of potential serious side effects, it is very important not to spread this cream on too large of an area (i.e. not larger than the size of 2 postcards).	

HYALASE®

Wockhardt UK Ltd.

Active Composition	Package Includes
Hyaluronidase	1500 I.U., powder for solution
<b>Product Summary</b>	
<p>Hyalase® injection contains the active ingredient hyaluronidase, which is an enzyme that is produced naturally by the body.</p> <p>This improves the penetration of subcutaneous or intramuscular injections and subcutaneous infusions.</p> <p>As solutions of the enzyme lose their activity in 12–24 hours, it is important that fresh solutions are prepared prior to each administration.</p>	

## JALUPRO® ENHANCER GEL

Professional Derma SA

### Active Composition

Trifolium pratense flower extract, acetyl tetrapeptide-3 (biomimetic peptide)

### Package Includes

1x9ml

### Product Summary

Jalupro® Enhancer Gel contains red clover extract (Trifolium pratense flower extract) and Acetyl tetrapeptide-3 (biomimetic peptide), specially formulated to help make eyelashes stronger, longer and thicker.

Acetyl tetrapeptide-3 is added to promote the protein matrix cell and the production of collagen, improving the resistance against loss of eyelashes. After 2 months of treatment, there is significant regrowth of new lashes.

## ZO® BALATONE™ CALMING TONER, PH BALANCER

ZO®, Inc.

### Active Composition

Hamamelis virginiana water, panthenol, sodium hyaluronate, sodium PCA, allantoin, alpha-isomethyl ionone

### Package Includes

1x180ml

### Product Summary

The witch hazel in ZO® Balatone™ helps to deep clean skin and tighten pores. This toner ingredient also helps reduce skin inflammation and soothe the skin. The special blend of moisturizers, including sodium hyaluronate, sodium PCA, panthenol, and allantoin, help condition, moisturize and soothe dry, weak skin. The toner also contains alpha hydroxy acids, which help to adjust the skin's pH.

The cooling feel of this toner on the skin helps to gently calm and soothe sensitive skin. Together, the ingredients help to deep clean, soothe, repair, and prepare the skin.

## ZO® BLEMISHBRIGHT™ BLEMISH CLEARING TREATMENT

ZO®, Inc.

### Active Composition

Salicylic acid 2%, arbutin, glutathione, soy isoflavones

### Package Includes

1x15ml

### Product Summary

ZO® BLEMISHBRIGHT™ Blemish Clearing Treatment is a solution made of salicylic acid, arbutin, and other ingredients, in a tube with a roller applicator. The solution forms a transdermal patch to help treat acne blemishes and reduce the appearance of hyperpigmentation.

It contains salicylic acid for treating acne. The LiquiPatch™ Technology instantly forms the treatment solution into an invisible transdermal patch which keeps the encapsulated salicylic acid in place to treat the acne pimple. Arbutin, glutathione, and soy isoflavones help to brighten skin affected by post-inflammatory hyperpigmentation.

## ZO® BRIGHTAMAX™ NON-FACIAL BRIGHTENING CREME

ZO®, Inc.

### Active Composition

Retinol, ascorbyl glucoside, soy isoflavones, stachys officinalis extract, acetyl glucosamine, ascorbyl glucoside, tocopherol

### Package Includes

1x75ml

### Product Summary

This skin cream contains skin-brightening ingredients such as retinol, ascorbic acid, glutathione, glucosamine, isoflavones, vitamins and herbal extracts.

This brightening cream helps reduce the look of hyperpigmentation on other areas of the body besides the face, without using hydroquinone. High-potency retinol and ascorbic acid-2 glucoside, which help to break up existing skin pigmentation and remove dead skin cells, increasing cell turnover.

## ZO® BRIGHTENEX™ 0.25% RETINOL

ZO®, Inc.

### Active Composition

0.25% retinol, tocopherol, ascorbyl glucoside, soy isoflavones, stachys officinalis extract, acetyl glucosamine

### Package Includes

1x75ml

### Product Summary

ZO® BRIGHTENEX™ contains high-potency retinol and ascorbic acid-2 glucoside, which exfoliate dead skin cells, increasing cell turnover and breaking up existing skin pigmentation to help brighten and even the skin tone. The stachys officinalis herbal extract has soothing properties and may help block messengers that trigger melanogenesis, reducing melanin production to limit dark spots. Glutathione, soy isoflavones, and n-acetyl glucosamine can help prevent new age spots and uneven pigmentation from forming while vitamins C and E can act as antioxidants.

## ZO® BRIGHTENEX™ 0.5% RETINOL

ZO®, Inc.

### Active Composition

0.5% retinol, tocopherol, ascorbyl glucoside, soy isoflavones, stachys officinalis extract, acetyl glucosamine

### Package Includes

1x75ml

### Product Summary

ZO® BRIGHTENEX™ contains high-potency retinol and ascorbic acid-2 glucoside, which exfoliate dead skin cells, increasing cell turnover and breaking up existing skin pigmentation to help brighten and even the skin tone. The stachys officinalis herbal extract has soothing properties and may help block messengers that trigger melanogenesis, reducing melanin production to limit dark spots. Glutathione, soy isoflavones, and n-acetyl glucosamine can help prevent new age spots and uneven pigmentation from forming while vitamins C and E can act as antioxidants.

## ZO® BRIGHTENEX™ 1.0% RETINOL

ZO®, Inc.

### Active Composition

1% retinol, tocopherol, ascorbyl glucoside, soy isoflavones, stachys officinalis extract, acetyl glucosamine

### Package Includes

1x75ml

### Product Summary

ZO® BRIGHTENEX™ contains high-potency retinol and ascorbic acid-2 glucoside, which exfoliate dead skin cells, increasing cell turnover and breaking up existing skin pigmentation to help brighten and even the skin tone. The stachys officinalis herbal extract has soothing properties and may help block messengers that trigger melanogenesis, reducing melanin production to limit dark spots. Glutathione, soy isoflavones, and n-acetyl glucosamine can help prevent new age spots and uneven pigmentation from forming while vitamins C and E can act as antioxidants.

## ZO® CEBATROL™ OIL CONTROL PADS, ACNE TREATMENT

ZO®, Inc.

### Active Composition

Salicylic acid 20%, mandelic acid, glycolic acid, urea, hamamelis virginiana (witch hazel) extract

### Package Includes

1x60 pads, 1x75ml bottle

### Product Summary

ZO® CEBATROL™ Oil Control Pads comes with 60 oil control pads combined with an oil control solution, with ingredients like salicylic acid, mandelic acid, glycolic acid, urea, and botanical extracts such as witch hazel. These pads are ideal for patients with oily, acne-prone skin. They help treat existing acne and prevent future acne breakouts.

## ZO® EFFECTS® EXFOLIATING POLISH

ZO®, Inc.

### Active Composition

Magnesium oxide, tocopheryl acetate, retinyl palmitate, ascorbyl palmitate

### Package Includes

1x65g

### Product Summary

It works by using ultra-fine magnesium crystals to exfoliate the skin, like an at-home microdermabrasion treatment. This exfoliation removes dead skin cells to help improve skin brightness and texture, it helps improve circulation, and it helps stimulate cell turnover for fresher and less-damaged skin cells. These actions can help improve the look of fine lines, hyperpigmentation, and other skin problems. ZO® EFFECTS® Exfoliating Polish also contains vitamins A, C, and E, which act as antioxidants.

This anti-aging exfoliating polish helps to brighten skin and stimulate cell turnover while enhancing penetration of other treatments into the skin.

## ZO® FOAMACLEANSE™ CLEANSER (ALL SKIN TYPES)

ZO®, Inc.

### Active Composition

Sodium lauroyl oat amino acids, glycerin

### Package Includes

1x240ml

### Product Summary

ZO® FOAMACLEANSE™ Cleanser contains ingredients such as sodium lauroyl oat amino acids, glycerin and a botanical extract blend including antioxidants. It is an effective deep cleanser that helps leave skin feeling hydrated and protected from the elements.

The glycerin in this gentle foaming cleanser helps to replenish the skin's hydration, keeping skin moisturized even after cleansing. It also contains a botanical extract blend of green tea, meadowsweet, and other ingredients, which help reduce skin irritation and act as antioxidants.

## ZO® GLYCOGENT™ EXFOLIATION ACCELERATOR

ZO®, Inc.

### Active Composition

Glycolic acid, lactic acid, aloe barbadensis leaf juice, camellia sinensis leaf extract, chamomilla recutita extract, tocopherol

### Package Includes

1x75ml

### Product Summary

ZO® GLYCOGENT™ Exfoliation Accelerator is a complex of 10% glycolic acid and lactic acid with antioxidants and soothing herbal extracts. The formula is paraben-free.

These alpha hydroxy acids (AHA) help to gently exfoliate dead cells from the skin's surface, stimulating growth of new skin cells. The anti-irritant and moisturizing ingredients, such as green tea, aloe, and chamomile, help to soothe and heal damaged skin, reducing the dryness and other negative effects of the exfoliation.

## ZO® HYDRAFIRM™ EYE BRIGHTENING REPAIR CRÈME

ZO®, Inc.

### Active Composition

Retinol, hydrolyzed sericin, kojic dipalmitate, caffeine, saccharomyces lysate extract, carnitine, coenzyme A

### Package Includes

1x15g

### Product Summary

Retinol and sericin help reduce the appearance of fine lines and wrinkles. Kojic dipalmitate helps lighten the appearance of dark circles. Ingredients such as caffeine, saccharomyces lysate extract, carnitine, and coenzyme A help to reduce puffiness. Other ingredients such as shea butter help replenish the skin's moisture. Finally, arnica montana flower extract has anti-irritant and antioxidant properties, helping to soothe the delicate eye area.

This eye cream targets signs of aging near the eyes such as fine lines, puffiness and dark circles, restoring a brighter appearance to the eye area.

## ZO® NORMACLEANSE™ CLEANSER (NORMAL-DRY)

ZO®, Inc.

### Active Composition

Sodium hyaluronate, panthenol, sodium PCA, glycerin, allantoin

### Package Includes

1x240ml

### Product Summary

The sodium hyaluronate, panthenol, glycerin, sodium PCA, and urea all help to replenish and retain moisture in the skin, keeping the skin hydrated and looking fresh. The allantoin in this skin cleanser has soothing and calming properties that helps prevent skin irritation during the cleansing process.

ZO® NORMACLEANSE™ Cleanser is suitable for patients with normal to dry skin, especially with early signs of aging. The gentle cleanser removes impurities while keeping the skin hydrated.

## ZO® OILACLEANSE™ CLEANSER (NORMAL-OILY)

ZO®, Inc.

### Active Composition

Jojoba Esters, salicylic acid, tocopheryl acetate, melaleuca alternifolia leaf oil, spiraea ulmaria extract

### Package Includes

1x240ml

### Product Summary

ZO® OILACLEANSE™ Cleanser contains jojoba beads to gently yet effectively exfoliate skin. Other cleansing ingredients remove oil and impurities from the skin, helping prevent pores from clogging and forming acne, and helping to prepare skin to receive other treatments. The salicylic acid in this skin cleanser helps to chemically exfoliate dead skin cells and clogged pores to leave the skin looking fresher. The encapsulated vitamin E, tea tree leaf oil and meadowsweet extract act as antioxidants.

Together, these ingredients help to cleanse the skin and unclog pores while protecting and nourishing the skin.

## ZO® RESTORACALM™ SOOTHING RECOVERY CRÈME

ZO®, Inc.

### Active Composition

Beta-glucan, buddleja davidii meristem cell culture, hydrolyzed sericin, retinol, ginseng root ferment filtrate

### Package Includes

1x50ml

### Product Summary

ZO® RESTORACALM™ Soothing Recovery Crème contains ingredients such as beta-glucan, which rapidly soothes skin and reduces the appearance of redness, and buddleja plant stem cells, which calms irritated skin and offers antioxidant protection. Hydrolyzed sericin, which is an amino acid normally found in silk, helps support the production of hyaluronic acid and collagen, restoring moisture and strength to skin.

This skin cream can help calm and soothe sensitive and irritated skin, reducing redness and flakiness after a retinol or other treatment.

## ZO® RETAMAX™ ACTIVE VITAMIN A MICRO EMULSION

ZO®, Inc.

### Active Composition

Retinol, beta-glucan, buddleja davidii meristem cell culture, hydrolyzed sericin, helianthus annuus seed oil, brassica oleracea italica (broccoli) seed

### Package Includes

1x75ml

### Product Summary

The main ingredient in ZO® RETAMAX™ is high-potency vitamin A, which helps exfoliate dead skin cells and stimulate skin cell renewal. This can help reduce the look of skin pigmentation and wrinkles for a more even skin tone. The hydrolyzed sericin is a silk amino acid which can help stimulate hyaluronic acid and collagen production, Buddleja stem cells are antioxidants and anti-irritants, vitamins C and E are antioxidants, and broccoli extract and sunflower seed oil are anti-irritants.

It helps to calm and protect the skin as it stimulates skin renewal to reduce the look of wrinkles and improve skin tone.

## ZO® ROZATROL™ NORMALIZING SERUM

ZO®, Inc.

### Active Composition

Helianthus annuus (sunflower) seed oil, magnesium aluminum silicate (argilla), brassica oleracea italica (broccoli) extract, milk protein

### Package Includes

1x50ml

### Product Summary

This serum for red, sensitive skin contains papain which provides very mild enzymatic exfoliation. An advanced amino acid complex helps support and restore skin structure. An exclusive plant stem cell complex provides antioxidant benefits that reduce inflammation. Other ingredients work together to restore moisture, prevent excess sebum production and provide anti-microbial benefits.

This daily treatment serum helps exfoliate, reduce excess oil and calm inflammation.

## ZO® EFFECTS® EXFOLIATING CLEANSER

ZO®, Inc.

### Active Composition

Tocopheryl acetate, salicylic acid, melaleuca alternifolia leaf oil, spiraea ulmaria extract

### Package Includes

1x150ml

### Product Summary

This cleanser for normal to oily skin contains scrubbing beads, salicylic acid, antioxidants and other ingredients. The salicylic acid in ZO® EFFECTS® Exfoliating Cleanser works like a light chemical peel and the texture of the cleanser also helps exfoliate dead skin cells, keeping pores clear. The encapsulated vitamin E is an antioxidant, and the tea tree oil and meadowsweet extract have both antioxidant and anti-irritant properties, so they help soothe and calm the skin.

This cleanser helps exfoliate to remove dead skin cells and clear pores for a clearer, fresher complexion.

## ZO® EFFECTS® HYDRATING CLEANSER

ZO®, Inc.

### Active Composition

Sodium hyaluronate, panthenol, urea, sodium PCA, glycerin, allantoin

### Package Includes

1x150ml

### Product Summary

ZO® EFFECTS® Hydrating Cleanser contains ingredients such as sodium hyaluronate, panthenol, glycerin, sodium PCA, and urea, which help replenish moisture that has been lost from skin. Allantoin helps soothe and calm skin irritation.

This cleanser helps remove impurities from the skin while moisturizing and soothing dry, irritated skin.

## ZO® OFFECTS® SULFUR MASQUE ACNE TREATMENT

ZO®, Inc.

### Active Composition

Sulfur (10%), kaolin, glycerin, bentonite

### Package Includes

1x85g

### Product Summary

The active ingredient in ZO® OFFECTS® SULFUR MASQUE is 10% sulfur, which helps treat and prevent acne, reducing sebum and calming irritation. The kaolin and bentonite clays help absorb oil at the skin's surface and remove dirt and oil from pores to keep them clear. This blemish treatment also contains glycerin, which helps repair the function of the skin barrier and hydrate skin to prevent over-drying, a common problem with aggressive acne treatments.

The acne mask helps deep clean pores, removing excess oil and helping prevent acne breakouts.

## ZO® OLLUMINATE® INTENSE EYE REPAIR

ZO®, Inc.

### Active Composition

Retinol, tocopheryl acetate, lavandula stoechas extract, mica, titanium dioxide (CI 77891)

### Package Includes

1x15g

### Product Summary

The main ingredient in ZO® OLLUMINATE® INTENSE EYE REPAIR is retinol. Matrixyl 3000 peptides help promote the production of collagen and elastin. The MDI complex in this skin cream mimics glycosaminoglycans, supporting collagen and elastin and helping to prevent their breakdown by metalloproteinase enzymes.

The peptides also help to improve hydration. Vitamin E acts as an antioxidant, and the lavender and phyllanthus emblica fruit extract act as antioxidants while also calming and soothing puffiness. Finally, the mica and titanium dioxide particles are optical diffusers that help to scatter light, reducing the look of crow's feet.

## ZO® OMMERSE® OVERNIGHT RECOVERY CREME

ZO®, Inc.

### Active Composition

Retinol, squalane, ceramide 2, shea butter oleyl esters, evodia rutaecarpa fruit extract, epilobium angustifolium extract

### Package Includes

1x50ml

### Product Summary

ZO® OMMERSE® OVERNIGHT RECOVERY CREME contains retinol, which helps to stimulate collagen production and skin renewal. This helps strengthen and thicken wrinkled skin for a more even skin tone. The skin cream also contains ceramide, soline, squalane, and shea butter, which work together to rehydrate the skin, creating a barrier that helps protect against water loss from the skin. The herbal extracts in this anti-aging cream, Canadian willowherb and evodia fruit, help to soothe and protect skin, reducing skin irritation and redness.

This anti-aging skin cream can help restore moisture and repair skin for a smoother, more hydrated look.

## ZO® OMMERSE® RENEWAL CREME

ZO®, Inc.

### Active Composition

Sodium hyaluronate, jojoba esters, avena sativa kernel extract, epilobium angustifolium extract, magnesium ascorbyl phosphate, tocopherol, ubiquinone

### Package Includes

1x50ml

### Product Summary

ZO® OMMERSE® RENEWAL CREME contains sodium hyaluronate and jojoba ester, which help restore moisture to dry, aging skin. Herbs such as oat and Canadian willowherb extract help to soothe the skin and reduce irritation while the photosomes provide enzymes for DNA repair. Vitamins C and E, which are called oxsomes, and the coenzyme-Q10 have antioxidant properties. The other major ingredient is retinol, which helps to stimulate collagen production and the renewal of the epidermis.

This daily skin cream helps to moisturize while promoting skin repair for a more even skin tone.

## ZO® OSSENTIAL® ADVANCED RADICAL NIGHT REPAIR

ZO®, Inc.

### Active Composition

Retinol, zanthoxylum bungeanum fruit extract, helianthus annuus seed oil, rosmarinus officinalis leaf extract, glycerin, plukenetia volubilis seed oil, tocopherol, ascorbic acid

### Package Includes

1x60ml

### Product Summary

The main ingredient in ZO® OSSENTIAL® ADVANCED RADICAL NIGHT REPAIR is high-potency, encapsulated retinol, which can help peel dead skin cells from the skin's surface. The sichuan pepper fruit extract, sunflower seed oil and rosemary leaf extract help soothe skin irritation, reducing inflammation and redness to give the skin a more youthful tone. The glycerin and plukenetia volubilis seed oil help fight skin dryness. Finally, the vitamin C, vitamin E, vitamin A, edelweiss and marubium vulgare plant stem cells act as antioxidants.

This potent, water-free formula helps reduce the appearance of brown spots and other signs of aging.

## ZO® OSSENTIAL® BRIGHTALIVE NON-RETINOL SKIN BRIGHTENER

ZO®, Inc.

### Active Composition

Acetyl tyrosine, proline, adenosine triphosphate, glycerin, papain, stachys officinalis extract

### Package Includes

1x50ml

### Product Summary

ZO® OSSENTIAL® BRIGHTALIVE contains a blend of skin brighteners that help block the production of melanin pigmentation. The amino acids acetyl tyrosine, proline, and adenosine triphosphate form a complex to help repair DNA, while the glycerin moisturizes. Papain is an enzyme that helps exfoliate the skin. The stachys officinalis leaf extract, sunflower seed oil, rosemary leaf extract and beta-glucan help to calm and soothe skin irritation.

Instead of retinol and hydroquinone, this skin brightener contains gentle ingredients to target hyperpigmentation.

## ZO® OSSENTIAL® C-BRIGHT SERUM 10% VITAMIN C

ZO®, Inc.

### Active Composition

Ascorbic acid, tocopheryl acetate, ubiquinone, squalane

### Package Includes

1x50ml

### Product Summary

The main ingredient in ZO® OSSENTIAL® C-BRIGHT SERUM 10% VITAMIN C is ascorbic acid. Tocopheryl acetate and coenzyme-Q10 can help provide antioxidant protection, and tetrahexyldecyl ascorbate helps prevent new pigment from forming within the skin. The final major ingredient in this serum, squalane, mimics the body's natural moisturizer to hydrate the skin.

This serum is ideal for patients who have aging and sun-damaged skin, with signs such as wrinkles, age spots and other hyperpigmentation.

## ZO® OSSENTIAL® DAILY POWER DEFENSE

ZO®, Inc.

### Active Composition

Retinol, palmitoyl tetrapeptide-7, tocopherol

### Package Includes

1x50ml

### Product Summary

ZO® OSSENTIAL® DAILY POWER DEFENSE contains ultrasomes and roxisomes, which introduce enzymes to help stimulate the skin's natural repair process after damage from UV exposure. Retinol can help stimulate collagen growth and skin renewal for a more firm and even skin tone and Matrixyl 3000, which is made of 2 peptides, can help with skin renewal for firmness and density. Ceramides can help restore the function of the skin barriers, and vitamin E is an antioxidant that can help protect skin from free radicals which damage skin cells.

This anti-aging lotion can help repair and protect against skin damage to reduce the look of wrinkles.

## ZO® OSSENTIAL® GROWTH FACTOR SERUM PLUS

ZO®, Inc.

### Active Composition

Dipeptide diaminobutyroyl benzylamide diacetate, retinol, buddleja davidii meristem cell culture, hydrolyzed sericin

### Package Includes

1x30ml

### Product Summary

ZO® OSSENTIAL® GROWTH FACTOR SERUM PLUS contains dipeptide diaminobutyroyl benzylamide diacetate, which is a synthetic version of snake venom. Researchers believe this neuropeptide helps block acetylcholine receptors, blocking sodium ion uptake by the muscle cells, keeping the muscles in a relaxed position.

In addition to retinol, another ingredient in this skin serum is ZPRO™, which is the ZO Protein and Antioxidant System, made of butterfly bush meristem cell culture and hydrolyzed sericin. These antioxidants and proteins help to stimulate collagen and hyaluronic acid production within the skin. Together, it relaxes wrinkles and hydrates skin.

## ZO® PHASE 1: DAILY SKINCARE PROGRAM

ZO®, Inc.

### Active Composition

Salicylic acid, glycolic acid, retinol, palmitoyl oligopeptide, titanium dioxide 82%

### Package Includes

EXFOLIATING CLEANSER: 1x40ml, EXFOLIATING POLISH: 1x16.2g, PADS ACNE PORE TREATMENT: 1x20 pads, DAILY POWER DEFENSE: 1x30ml, SUNSCREEN + PRIMER SPF 30: 1x15ml

### Product Summary

ZO® PHASE 1: DAILY SKINCARE PROGRAM is a skincare set with 5 products suitable for younger patients who wish to prevent wrinkles and other signs of aging. The products help cleanse and exfoliate skin, stimulate skin cell turnover and repair, and protect skin from the sun to help maintain younger-looking skin.

This skincare program targets an aging complexion with wrinkles and hyperpigmentation. Usually people between the ages of 17 and 25 will use ZO® PHASE 1: DAILY SKINCARE PROGRAM to help prevent signs of aging.

## ZO® PHASE 2: ANTI-AGING PROGRAM

ZO®, Inc.

### Active Composition

Salicylic acid, glycolic acid, retinol, palmitoyl oligopeptide, titanium dioxide 82%

### Package Includes

EXFOLIATING CLEANSER: 1x40ml, EXFOLIATING POLISH: 1x16.2g, PADS ACNE PORE TREATMENT: 1x20 pads, DAILY POWER DEFENSE: 1x30ml, GROWTH FACTOR SERUM PLUS: 1x30ml, SUNSCREEN + PRIMER SPF 30: 1x15ml

### Product Summary

ZO® PHASE 2: ANTI-AGING PROGRAM is a skincare set with 6 products suitable for patients with early signs of aging. The products help cleanse and exfoliate skin, stimulate skin cell renewal and repair, and protect skin from the sun.

These products are ideal for patients between the ages of 26 and 44. These patients may already have early or significant signs of environmental damage and aging, and they want to help reverse their signs of aging such as fine lines and wrinkles while helping prevent future damage.

## ZO® PHASE 3: AGGRESSIVE ANTI-AGING PROGRAM

ZO®, Inc.

### Active Composition

Salicylic acid, glycolic acid, retinol, palmitoyl oligopeptide, titanium dioxide 82%

### Package Includes

HYDRATING CLEANSER: 1x40ml, EXFOLIATING POLISH: 1x16.2g, PADS ACNE PORE TREATMENT: 1x20 pads, DAILY POWER DEFENSE: 1x30ml, ADVANCED RADICAL NIGHT REPAIR: 1x30ml, RENEWAL CREME: 1x50ml, SUNSCREEN + PRIMER SPF 30: 1x15ml

### Product Summary

ZO® PHASE 3: AGGRESSIVE ANTI-AGING PROGRAM is a skincare set with 7 products. The products in this skincare program help cleanse and exfoliate skin, stimulate skin cell renewal and repair, and provide antioxidant and sun protection.

These products are ideal for patients aged 45 and older who are concerned about deeper lines and wrinkles, thinning skin with reduced firmness and elasticity, and age spots or other hyperpigmentation.

EARFOLD™ IMPLANTABLE CLIP SYSTEM

Allergan

Active Composition	Package Includes
Implantable clip system	1 clip, insert device
<h3>Product Summary</h3> <p>EARFOLD™ Implantable Clip System is made of a metal alloy that retains its shape, adjusting the ear's position to reduce prominence.</p> <p>Use this device to correct prominent ears for a more streamlined look, avoiding more invasive otoplasty or pinnaplasty surgery. Administer this device to patients over the age of 7, adjusting ear shape with long-lasting results.</p>	

## EYLEA® NON-ENGLISH

Bayer

### Active Composition

Aflibercept

### Package Includes

1 vial

### Product Summary

Eylea contains human antibody fragment, known for its ability to prevent new blood vessels from forming under the retina.

Use this injectable eye drug to treat wet age-related macular degeneration, retinal swelling from blood vessel blockage, diabetic retinopathy, and other eye diseases. Administer this ophthalmic injection to prevent blood and fluid leakage under the retina.

## LUCENTIS®

Novartis

### Active Composition

Ranibizumab

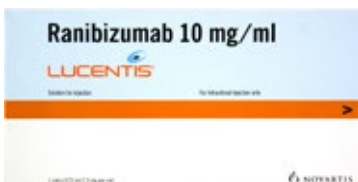

### Package Includes

1 vial

### Product Summary

Lucentis contains human antibody fragments, known for their ability to prevent new blood vessel formation under the retina.

Use this eye injection to treat retinal diseases including wet age-related macular degeneration, macular edema following retinal vein occlusion, diabetic macular edema, diabetic retinopathy with DME, and myopic choroidal neovascularization. Administer this eye drug to prevent leakage of blood and fluid under the retina.

## LUCENTIS® NON-ENGLISH

Novartis

### Active Composition

Ranibizumab

### Package Includes

1 vial

### Product Summary

Lucentis contains human antibody fragments, which help prevent new blood vessels from forming under the retina.

Use this injectable eye drug to treat retinal diseases including wet age-related macular degeneration, macular edema following retinal vein occlusion, diabetic macular edema, diabetic retinopathy with DME, and myopic choroidal neovascularization. Administer this eye injection to prevent blood and fluids from leaking under the retina.

## ACULAR LS™ 0.4% EYE DROPS NON-ENGLISH

Allergan

### Active Composition

4mg/ml ketorolac tromethamine

### Package Includes

1x5ml

### Product Summary

Acular LS™ 0.4% is a non-steroidal anti-inflammatory (NSAIDs) ophthalmic solution.

Acular LS™ 0.4% is formulated to reduce ocular pain, visual sensitivity, burning and stinging sensation experienced by patients following corneal refractive surgery.

Apply 1 drop into the affected eye(s), 4 times daily, for up to 4 days.

## ALPHAGAN® P 0.15% EYE DROPS NON-ENGLISH

Allergan

### Active Composition

1.5mg/ml brimonidine tartrate.

### Package Includes

1x5ml

### Product Summary

Alphagan® P 0.15% is an ophthalmic antiglaucoma medication.

Alphagan® P 0.15% is prescribed for patients suffering from elevated intraocular pressure caused by ocular hypertension or open-angle glaucoma.

Instill 1 drop into the affected eye(s), 3 times daily, approximately 8 hours apart.

## CILOXAN 0.3% EYE DROPS NON-ENGLISH

Alcon

### Active Composition

3mg/ml ciprofloxacin.

### Package Includes

1x5ml

### Product Summary

Ciloxan 0.3% is an antibacterial ophthalmic solution. Ciloxan 0.3% is for patients suffering from corneal ulcers and conjunctivitis caused by susceptible strains of bacteria.

Corneal Ulcers: Apply 2 drops into the affected eye(s) every 15 minutes for the first 6 hours, followed by 2 drops every 30 minutes for the rest of the day.

Bacterial Conjunctivitis: Apply 2 drops into affected eye(s) every 2 hours while awake for the first 2 days, followed by 1 to 2 drops every 4 hours while awake for the next 5 days.

## CILOXAN 0.3% OPHTHALMIC OINTMENT NON-ENGLISH

Alcon

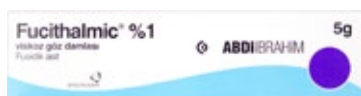

Active Composition	Package Includes
3mg/g ciprofloxacin.	1x3.5g
Product Summary	
<p>Ciloxan 0.3% is an antibacterial ophthalmic ointment.</p> <p>Ciloxan 0.3% is prescribed for patients diagnosed with bacterial conjunctivitis.</p> <p>Apply ½ inch ribbon into the affected eye(s) 3 times daily for the first 2 days, followed by ½ inch ribbon twice daily for the next 5 days.</p>	

## EXOCIN 0.3% OPHTHALMIC SOLUTION NON-ENGLISH

Allergan

Active Composition	Package Includes
3mg/ml ofloxacin	1x5ml
Product Summary	
<p>Exocin 0.3% is an antibacterial topical ophthalmic solution.</p> <p>Exocin 0.3% is intended for patients affected by bacterial infections of the external eye.</p> <p>Apply 1 or 2 drops into the affected eye(s) every 2 to 4 hours for the first 2 days, followed by 4 times daily.</p>	

## FUCITHALMIC 1% VISCOUS EYE DROPS NON-ENGLISH

Leo Pharma

Active Composition	Package Includes
10mg/g fusidic acid	1-5g preloaded aluminum tube, package insert.
Product Summary	
<p>Fucithalmic 1% is an antibacterial viscous ophthalmic solution.</p> <p>Fucithalmic 1% is formulated for patients suffering from superficial ocular infections caused by fusidic acid susceptible bacterial strains.</p> <p>Instill 1 drop into both eyes twice daily, every 12 hours for as long as recommended by the physicians (usually 1 week).</p>	

## MAXIDEX OPHTHALMIC OINTMENT 0.1% NON-ENGLISH

Alcon

### Active Composition

1mg/g dexamethasone

### Package Includes

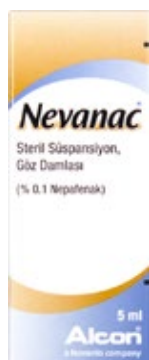

1x3.5g

### Product Summary

Maxidex 0.1% is a corticosteroid topical ophthalmic ointment.

Maxidex 0.1% is a potent anti-inflammatory ophthalmic ointment that is effective against steroid responsive eye inflammations such as herpes zoster keratitis, cyclitis, iritis, and allergic conjunctivitis. It also soothes corneal injuries caused heat burns, chemical, or foreign bodies.

Administer ½ to 1 inch ribbon into the conjunctival sac of inflamed eye(s) up to 4 times daily. Following improvements, reduce dosage gradually to once daily until the inflammation subsides.

## NEVANAC EYE DROP SUSPENSION 0.1% NON-ENGLISH

Alcon

### Active Composition

1mg/ml nepafenac

### Package Includes

1x5ml

### Product Summary

Nevanac 0.1% is an anti-inflammatory ophthalmic suspension.

Nevanac 0.1% is a non-steroidal anti-inflammatory suspension designed to subside ocular pain and inflammation caused by cataract surgery.

Start applying 1 drop into the affected eye(s) 3 times daily a day before the cataract surgery. Continue the dosage on the day of surgery and the first 2 weeks post-procedure.

## PATANOL 0.1% OPHTHALMIC SOLUTION NON-ENGLISH

Alcon

### Active Composition

1mg/ml olopatadine

### Package Includes

1x5ml

### Product Summary

Patanol 0.1% is an anti-histamine eye drop.

Patanol 0.1% helps to suppress ocular inflammations caused by the release of histamine from mast cells. Symptoms like redness, watery eyes, and itchiness will be swiftly lessened.

Administer 1 drop into inflamed eye(s) twice daily, set 6 to 8 hours apart.

## REFRESH TEARS™ NON-ENGLISH

Allergan

### Active Composition

0.5% carboxymethylcellulose sodium

### Package Includes

1x15ml

### Product Summary

Refresh Tears™ is a lubricating eye drop.

Refresh Tears™ is intended to temporarily moisturize dry and irritated eyes by mimicking the action of natural tears. It also protects the eyes from irritants like wind and/or sun.

Apply 1 to 2 drops into the affected eye(s) as required.

## RESTASIS 0.05% OPHTHALMIC EMULSION NON-ENGLISH

Allergan

### Active Composition

0.5mg/ml cyclosporine

### Package Includes

30x0.4ml

### Product Summary

Restasis 0.05% is an immunosuppressing ophthalmic emulsion.

Restasis 0.05% is indicated for patients with chronic dry eyes. It helps to increase the natural production of tears by suppressing ocular inflammation caused by keratoconjunctivitis sicca.

Apply 1 drop in each eye twice daily, 12 hours apart.

## TOBRADEX OPHTHALMIC SUSPENSION 0.1% NON-ENGLISH

Alcon

### Active Composition

3mg/ml tobramycin and 1mg/ml dexamethasone

### Package Includes

1x5ml

### Product Summary

TobraDex is a dual-action ophthalmic suspension with antibacterial and anti-inflammatory properties.

TobraDex is a dual-action eye drop that eliminates infection-causing bacteria and suppresses any ocular inflammations associated with the infections.

Apply 1 to 2 drops into the infected eye(s) every 4 to 6 hours. This dosage can be increased to 1 to 2 drops every 2 hours during the first 24 to 48 hours. The dosage can then be tapered once clinical improvements are observed.

## TOBREX OPHTHALMIC SOLUTION 0.3% NON-ENGLISH

Alcon

### Active Composition

3mg/ml tobramycin

### Package Includes

1x5ml

### Product Summary

Tobrex 0.3% is an antibacterial eye drop.

Tobrex 0.3% treats ocular bacterial infections by irreversibly binding to the infection-causing bacteria.

Patients with mild to moderate bacterial infections must administer 1 to 2 drops into the infected eye(s) every 4 hours. Those with severe infections must apply 2 drops into the affected eye(s) every hour until improvements.

## TOBREX OPHTHALMIC OINTMENT 0.3%

Alcon

### Active Composition

3mg/g tobramycin

### Package Includes

1x3.5g

### Product Summary

Tobrex 0.3% is an antibacterial ophthalmic ointment.

Tobrex 0.3% relieves ocular infections caused by bacteria, particularly gram-negative bacteria.

Patients with mild to moderate bacterial infections must apply ½ inch ribbon into the infected eye(s) 2 to 3 times daily. Those with more severe infections must instill ½ inch ribbon into the infected eye(s) every 3 to 4 hours until improvements.

## ZADITEN® 0.025% EYE DROPS NON-ENGLISH

Novartis

### Active Composition

0.25mg/ml ketotifen

### Package Includes

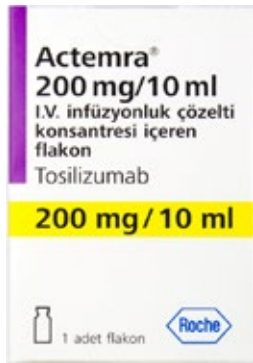

1x5ml

### Product Summary

Zaditen 0.025% is an anti-allergic eye drop.

Zaditen 0.025% is indicated for the therapeutic treatment of seasonal allergic conjunctivitis or hay fever as evidenced by ocular symptoms like itchiness, redness, and irritation.

Instill 1 drop into the conjunctival sac of affected eye(s) twice daily.

## ACTEMRA® 200MG/10ML

Genentech

### Active Composition

200mg/10ml tocilizumab

### Package Includes

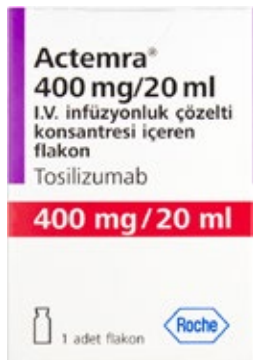

1 vial

### Product Summary

Actemra® contains tocilizumab, which binds to Interleukin-6 receptors, reducing inflammation.

Use this infusion to treat rheumatoid arthritis, reducing inflammation to ease symptoms like swelling and pain.

Administer this infusion monthly to help maintain rheumatoid arthritis relief.

## ACTEMRA® 400MG/20ML

Genentech

### Active Composition

400mg/20ml tocilizumab

### Package Includes

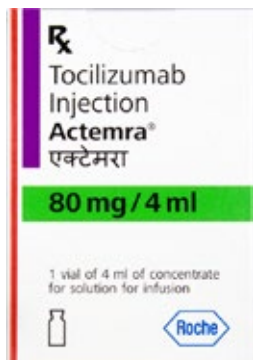

1 vial

### Product Summary

Actemra® contains tocilizumab, which binds to Interleukin-6 receptors, reducing inflammation.

Use this infusion to treat rheumatoid arthritis, reducing inflammation to ease symptoms like swelling and pain.

Administer this infusion monthly to help maintain rheumatoid arthritis relief.

## ACTEMRA® 80MG/4ML

Genentech

### Active Composition

80mg/4ml tocilizumab

### Package Includes

1 vial

### Product Summary

Actemra® contains tocilizumab, which binds to Interleukin-6 receptors, reducing inflammation.

Use this infusion to treat rheumatoid arthritis, reducing inflammation to ease symptoms like swelling and pain.

Administer this infusion monthly to help maintain rheumatoid arthritis relief.

IMAGE NOT AVAILABLE

**BENLYSTA 120MG**

GlaxoSmithKline

Active Composition	Package Includes
120mg/5ml vial belimumab	1x5ml
<b>Product Summary</b> Benlysta 120mg is an immunosuppressant designed to be used as an adjunctive therapy for patients with systemic lupus erythematosus (SLE). Benlysta 120mg alleviates inflammation by reducing the severity of B-cell mediated autoimmune reactions. Reconstitute the powder with 1.5ml of water for injection to produce a 80mg/ml belimumab solution before infusing it intravenously.	

IMAGE NOT AVAILABLE

**BENLYSTA 400MG**

GlaxoSmithKline

Active Composition	Package Includes
400mg/20ml vial belimumab	1x20ml
<b>Product Summary</b> Benlysta 400mg is an immunosuppressing medication formulated as an adjunctive treatment for patients with systemic lupus erythematosus (SLE). Benlysta 400mg lessens the severity of inflammation by reducing the activity of B-cell mediated autoimmune reactions. Prior to intravenous infusion of this medication, dissolve the powder with 4.8ml of water for injection into a 80mg/ml belimumab solution.	

IMAGE NOT AVAILABLE

**CIMIZIA**

UCB Pharma

Active Composition	Package Includes
200mg/ml certolizumab pegol	2x1ml prefilled syringes
<b>Product Summary</b> Cimzia is an anti-inflammatory prescription medication. Cimzia is indicated for patients suffering from inflammatory diseases e.g. rheumatoid arthritis, axial spondyloarthritis, and psoriatic arthritis. Inject this tumor necrosis factor (TNF) blocker subcutaneously into the skin. The dosage varies depending on the inflammatory disease it is indicated for.	

## ORENCIA®

Bristol Myers Squibb

### Active Composition

Abatacept

### Package Includes

1 vial

### Product Summary

Orencia® contains abatacept, which helps prevent signals that activate T cells.

Use this infusion to treat rheumatoid arthritis, reducing inflammation to ease symptoms like swelling and pain.

Administer this infusion every 2 weeks initially to help maintain rheumatoid arthritis relief.

## REMICADE®

Janssen Biotech

### Active Composition

Infliximab, dibasic sodium phosphate dihydrate, monobasic sodium phosphate monohydrate, polysorbate 80

### Package Includes

1 vial

### Product Summary

Remicade® contains infliximab, a monoclonal antibody which prevents chemical messengers from triggering an immune response.

Use this infusion to treat rheumatoid arthritis, reducing inflammation to ease symptoms like swelling and pain.

Administer this infusion every 6 to 8 weeks to help maintain rheumatoid arthritis relief.

IMAGE NOT AVAILABLE

**ACLASTA®**

Novartis

**Active Composition**

Zoledronic acid

**Package Includes**

1 vial

**Product Summary**

Aclasta® contains zoledronic acid, a bisphosphonate that helps inhibit calcium release from bones.

Use this infusion to treat osteoporosis, reducing bone loss and allowing bones to strengthen, reducing the chance of fracture. Administer this infusion once a year to help protect bones.

**ACLASTA® NON-ENGLISH**

Novartis

**Active Composition**

Zoledronic acid

**Package Includes**

1 vial

**Product Summary**

Aclasta® contains zoledronic acid, a bisphosphonate that helps inhibit calcium release from bones.

Use this infusion to treat osteoporosis, reducing bone loss and allowing bones to strengthen, reducing the chance of fracture. Administer this infusion once a year to help protect bones.

**BONVIVA® INJECTION**

Genentech

**Active Composition**

Ibandronic acid, sodium chloride, acetic acid, sodium acetate trihydrate

**Package Includes**

1 prefilled syringe

**Product Summary**

Bonviva® contains ibandronic acid, a bisphosphonate that helps reduce bone loss.

Use this injection or pills to treat osteoporosis, reducing bone loss and allowing bones to strengthen, reducing the chance of fracture. Administer this drug once a month to help protect bones.

## BONVIVA® TABLETS

Genentech

### Active Composition

Ibandronate sodiumlactose monohydrate, povid1, microcrystalline cellulose, crospovidone purified stearic acid, colloidal silicon dioxide

### Package Includes

3x150mg tablets

### Product Summary

Bonviva® contains ibandronic acid, a bisphosphonate that helps reduce bone loss.

Use this injection or pills to treat osteoporosis, reducing bone loss and allowing bones to strengthen, reducing the chance of fracture. Administer this drug once a month to help protect bones.

## PROLIA®

Amgen

### Active Composition

Denosumab, sorbitol, acetate, polysorbate 20

### Package Includes

1 prefilled syringe

### Product Summary

Prolia® contains denosumab, a monoclonal antibody that helps prevent osteoclasts from forming to break down bone.

Use this injection to treat osteoporosis, reducing bone loss and allowing bones to strengthen, reducing the chance of fracture. Administer this drug twice a year to help protect bones.

## PROLIA® NON-ENGLISH

Amgen

### Active Composition

Denosumab, sorbitol, acetate, polysorbate 20

### Package Includes

1 prefilled syringe

### Product Summary

Prolia® contains denosumab, a monoclonal antibody that helps prevent osteoclasts from forming to break down bone.

Use this injection to treat osteoporosis, reducing bone loss and allowing bones to strengthen, reducing the chance of fracture. Administer this drug twice a year to help protect bones.

## COPPER TT 380 SLIMLINE IUD

Durbin House

### Active Composition

### Package Includes

1 IUD

### Product Summary

Copper TT 380 Slimline intrauterine device (IUD) is made of plastic wrapped in copper wire, which helps release copper ions into the uterus.

This IUD is highly effective at preventing the sperm from reaching an egg, thus, preventing pregnancy.

Once inserted into the uterus, this device could prevent pregnancy for up to 10 years.

## DEPO-PROVERA®

Pfizer

### Active Composition

Medroxyprogesterone acetate, hydrochloric acid, methylparaben, polyethylene glycol, polysorbate, propylparaben, sodium chloride, sodium hydroxide

### Package Includes

1 prefilled syringe

### Product Summary

Depo-Provera® contains medroxyprogesterone acetate, similar to natural progesterone which inhibits follicle growth and changes the cervical mucus to inhibit sperm.

Use this injection to help prevent pregnancy with 99% effectiveness, reducing the chance of ovulation and of sperm reaching an egg. Inject this contraceptive every 3 months to continue birth control protection.

## EUROGINE/ COPPER T 380 A

Eurogine SL

### Active Composition

### Package Includes

1 IUD

### Product Summary

EUROGINE/COPPER T 380 A IUD is a Y-shaped intrauterine device (IUD) that is made of high quality pure copper wire with a diameter of 0.25mm and 380mm<sup>2</sup> of copper surface.

This IUD prevents pregnancy by reducing the survival of sperm as well as by reducing the motility of an ovum into the uterus.

Once implanted in the womb, each IUD could last for approximately 5 years.

## MENOPUR® 75U

Ferring

### Active Composition

Menotropins (75 IU of follicle-stimulating hormone (FSH), 75 IU of luteinizing hormone (LH)

### Package Includes

1 vial

### Product Summary

Menopur 75IU is an injectable medication made of the menotropins follicle stimulating hormone (FSH) and luteinizing hormone (LH), at 75IU each. These hormones act on the ovaries to stimulate the growth of follicles which produce ova. This should in turn increase the number of eggs produced, and with more eggs available, the chance of fertilization increases.

## MIRENA®

Bayer

### Active Composition

Levonorgestrel

### Package Includes

1 IUD

### Product Summary

Mirena® contains levonorgestrel, similar to natural progesterone which inhibits follicle growth and changes cervical mucus to inhibit sperm.

Use this intrauterine device to help prevent pregnancy with 99% effectiveness, reducing the chance of ovulation and of sperm reaching an egg. Insert this device for contraception that lasts up to 5 years, removed at any time to restore fertility within about a year.

## MIRENA® NON-ENGLISH

Bayer

### Active Composition

Levonorgestrel

### Package Includes

1 IUD

### Product Summary

Mirena® contains levonorgestrel, similar to natural progesterone which inhibits follicle growth and changes cervical mucus to inhibit sperm.

Use this intrauterine device to help prevent pregnancy with 99% effectiveness, reducing the chance of ovulation and of sperm reaching an egg. Insert this device for contraception that lasts up to 5 years, removed at any time to restore fertility within about a year.

NEXPLANON®

Merck

Active Composition	Package Includes
Ethylene vinyl acetate (EVA) copolymer core, synthetic progestin etonogestrel, barium sulfate(radiopaque ingredient), EVA copolymer skin	1 implant
Product Summary	
Nexplanon® contains etonogestrel, similar to natural progesterone which inhibits follicle growth and changes cervical mucus to inhibit sperm. Use this implant device to help prevent pregnancy with 99% effectiveness, reducing the chance of ovulation and of sperm reaching an egg. Insert this device for contraception that lasts up to 3 years, removed at any time to restore fertility.	

T-SAFE CU 200B/380A IUD

Active Composition	Package Includes
	1 IUD
Product Summary	
T-Safe CU 200B/380A IUD is made of plastic wrapped in copper wire, which helps release copper ions into the uterus. The release of copper ions stimulates the release of white blood cells and prostaglandin, resulting in successful prevention of pregnancy. This contraceptive effects of this IUD could last for about 10 years once placed in the uterus.
